TRUECOMMERCE SELECTED AS PREFERRED EDI SOLUTION FOR INTUIT'S QUICKBOOKS ENTERPRISE SOLUTIONS

PITTSBURGH... TrueCommerce has been selected as the preferred Electronic Data Interchange (EDI) solution for QuickBooks Enterprise Solutions (QBES) by the software's publisher, Intuit Inc. The exclusive agreement was announced during a recent QBES users conference.

Available for as little as \$750, the TrueCommerce EDI solution is designed to easily integrate with QuickBooks Enterprise, helping to save users time, money and costly mistakes by greatly reducing or eliminating the need for manually re-keying information. Unlike conventional methods, such as sending faxes, emails or postal mail, EDI enables users to import and export information directly to and from QuickBooks Enterprise.

"Being designated by Intuit as the preferred EDI solution for QuickBooks Enterprise Solutions is affirmation that our commitment to making EDI painless is delivering meaningful value while addressing a key need for QBES users," said George McKee, president and chief executive officer, TrueCommerce.

McKee added, "This announcement is especially exciting for us because we have been offering EDI solutions designed to integrate with QuickBooks since TrueCommerce was founded. Without a doubt, QuickBooks users represent a significant and important portion of our customer base."

Aside from affordability, another key reason Intuit selected TrueCommerce was how easy it is for a user to implement the solution.

"The EDI solution from TrueCommerce provides key functionality in an integrated and easy to use package," said Bill Lucchini, vice president, Intuit Mid Market Group. "This was very important to us as we are dedicated to providing QuickBooks Enterprise customers with the business management power Mid Market companies need with the ease of use synonymous with all QuickBooks products.

TrueCommerce specializes in providing an easy-to-use and affordable EDI solution designed for small and mid-tier companies. TrueCommerce's end-to-end solution includes everything required to successfully implement EDI, including data mapping software, network services and free support. A module that creates advance ship notices (ASNs) and UCC-128 barcode labels is also available. Users can learn more about TrueCommerce's integration with Intuit QuickBooks Enterprise Solutions by visiting www.truecommerce.com/edioverviewpr/ or by calling 1-888-430-1191.
