

TrueCommerce TC.Net™

TC.Net is a transactional gateway used in conjunction with our other products and services to provide EDI transaction routing, control, and administration between trading partners regardless of platform or system. Using a standard Internet connection, customers exchange EDI transactions securely with their trading partners. The entire transaction process is automated and requires no direct involvement by our customers or their trading partners. TC.Net also provides online access to historical transaction data.

Pricing

Effective March, 2008
