TRUECOMMERCE EMBEDDED EDI

MICROSOFT DYNAMICS 365 FOR OPERATIONS

ACCOUNTS RECEIVABLE

BENEFITS

➤ Single connection to Dynamics 365 provides seamless access to TrueCommerce's global trading partner community

➤ End-to-end solution approach offers a complete solution, implemented and managed by one, trusted and experienced provider

➤ Embedded Dynamics 365 solution aligns EDI processing with the business users that manage supply chain relationships, reducing impact on IT resources

➤ Built in X++ to extend Dynamics 365 for EDI workflows, TrueCommerce offers the tightest level of integration

➤ Rapid deployment via Lifecycle Services allows for a quick and easy installation

FAMILIAR DYNAMICS 365 LOOK AND FEEL MINIMIZES TIME TO PRODUCTIVITY AND ENHANCES UTILITY

Built exclusively for Microsoft Dynamics 365 for Operations, deployed using Lifecycle Services, TrueCommerce offers the highest level of flexibility as it relates to EDI document integration, accommodating your unique Dynamics 365 environment, and scaling with your business. When working with Microsoft to design our solution, TrueCommerce applied Microsoft's best of breed approach to deliver high volume throughput allowing for multi-threaded processing versus a linear approach commonly deployed.

TrueCommerce offers a truly embedded EDI solution, built within the native Dynamics 365 platform, that your team will find easy to implement. TrueCommerce extends Dynamics 365 entities to offer turnkey support within Dynamics 365 for complex EDI workflows including order-to-cash, transportation and logistics processes.

TrueCommerce also provides the depth and flexibility to accommodate for modifications to your Dynamics 365 environment. Our product design ensures that any customizations made to your system, such as the addition of new fields, custom business logic, or additional workflows, do not require reprogramming in your mission-critical EDI system.

CONFIGURABLE BUSINESS RULES ENHANCE PROCESSING SPEED AND ACCURACY

TrueCommerce includes a rich set of configurable business rules and cross-references to define "conditional" rules, or to define when to alert your personnel when discrepancies are identified such as price variances, stock outs, invoice calculation errors and much more. TrueCommerce offers the flexibility to define unique business rules to accommodate for the varying demands placed upon your business when supporting different distribution models and order profiles.

TrueCommerce
A HIGHJUMP COMPANY™

Microsoft®
GOLD CERTIFIED
Partner

System, company or customer-level rules can be configured by order type, item, document, ship-to location, and more, to provide unmatched scalability.

TrueCommerce's design minimizes the ongoing and arduous task of maintaining compliance with your trading partners. Inventory and unit of measure conversions, business rules, date manipulations and much more can be defaulted at a system or company level or defined at the customer level for ultimate granularity.

SCALABLE INVESTMENT CURBS COSTS AS YOUR BUSINESS CONTINUES TO GROW

The TrueCommerce technical architecture was built for high volume transaction exchanges, storage and throughput by leveraging best-of-breed tools and technologies.

Scalability also implies that your EDI partner will be able to provide support and services as your business demands them. TrueCommerce doesn't charge for support incidents or mapping changes caused by modified trading partner requirements.

INTEGRATED SHIPMENT PACKING AND ASN GENERATION

➤ Ensure compliance by driving consistent processes through configured business rules

➤ Optional automatic pack slip posting after packing shipments

➤ Generate EDI ASN's directly from Dynamics 365 for Operations warehousing modules

➤ Generate GS1 (UCC-128) labels

EDI COMPLIANCE SOLUTIONS FOR DYNAMICS 365

Additional Features:

➤ Flexibility to integrate non-EDI standards such as XML ASCII delimited, fixed position files and others

➤ Optional graphical mapping tool provides greater flexibility for managing unique trading partner and business requirements

➤ Designed to accommodate customer deployed web services, and other workflow procedures

➤ TrueCommerce global trading partner community access, including support for XML and global EDI data standards through a single connection to your Dynamics 365 for Operations environment

Additional Benefits:

➤ Exceptional error checking and automated data transformations streamline processing and reduce chargebacks

➤ TrueCommerce offers flexible deployment models including on-premises based connectivity and translation or a fully-hosted model

➤ Depth and flexibility to accommodate changes in the Dynamics 365 work flow without adding reprogramming requirements in the EDI solution

➤ Easy to learn and use – Our configurable solution adapts to your business processes, reducing the learning curve for end users

➤ Scalable, multi-company, multi-deployment architecture to manage and support the demands and complexity of enterprise EDI requirements

"With over 10,000 deployments across platforms, our expertise in managing EDI implementation processes is unmatched."
