

EDI IN THE CLOUD FOR INFOR VISUAL

We Make EDI Painless!

TrueCommerce® EDI Solutions makes it painless to implement electronic data interchange (EDI) by delivering easy-to-use, robust and affordable solutions.

- Complete, end-to-end EDI solution for Infor VISUAL from one reliable source
- Proven sales and warehouse document integration that's affordable, and easy to use
- Supports more than 23,000 trading partner maps with updates at no additional charge
- Unlimited, US-based support, free software updates, no annual contracts and no maintenance fees

COMPLETE SOLUTION FROM ONE SOURCE

Our unique modular approach enables us to offer a true end-to-end EDI solution that is easy to use and unparalleled in scalability. We've taken the complexity out of implementing EDI by providing all four of the components you need to successfully deploy EDI:

Connectivity with your trading partner(s) is required to transmit EDI documents, whether directly via the Internet or through a "Value Added Network," or VAN. The TrueCommerce Trading Network (VAN) is our Internet-based transaction gateway, across which your EDI transactions are transmitted, providing connectivity with all of your trading partners. It is compliant with virtually any connectivity protocol, including AS1/AS2/AS3, FTP and (if required) VAN interconnects.

Web-based EDI Translator, TrueCommerce Transaction Manager™ is our user-friendly EDI translator that converts business documents from raw EDI data (ANSI ASC X12, EDIFACT, XML, and others) into a human-readable business form.

Data Mapping and Integration provide the ability to seamlessly send and receive data between Transaction Manager and Infor VISUAL through the TrueCommerce Business System Plug-In™.

This is achieved by processing EDI transactions through a collection of intelligent software modules. These modules are programmed to format your inbound EDI transactions to match against your configurations within Infor VISUAL as well as match your outbound transactions against your trading partner's requirements. As your business grows and you acquire new customers, additional trading partner maps can easily be added and seamlessly integrated with your TrueCommerce solution.

Support is a critical component of a complete, end-to-end EDI solution. Our Professional Services team has the broad range of expertise to handle not only all of your trading partners' requirements, but also any technical issues related to business system integration and the sending and receiving of your EDI documents. You can also count on the support team to provide the advice and guidance you'll need to be successful. Even if you aren't familiar or comfortable with EDI, we'll be there to help you get up and running, step by step.

As an EDI managed service provider, TrueCommerce adapts to the inevitable changes demanded by current and future trading partners without requiring expert in-house staff or expensive infrastructure.

ENHANCE PRODUCTIVITY AND REDUCE COSTS BY INTEGRATING EDI WITH INFOR VISUAL

EDI is more than a way to comply with customer requirements. By integrating EDI with your business system, you can eliminate time-consuming, error-prone manual tasks, to accelerate key business processes and improve supply chain visibility.

Integrating your EDI solution with Infor VISUAL reduces the need to print or re-enter transactions, which makes order processing faster and more efficient without sacrificing accuracy. TrueCommerce EDI offers powerful sales and warehouse document integration that's proven, affordable and easy-to-use—enabling you to meet all of your trading partners' EDI requirements.

SUPPORTS KEY EDI DOCUMENTS FOR ORDER-DRIVEN MANUFACTURING

The TrueCommerce EDI solution for Infor VISUAL supports the key EDI documents that order-driven manufacturers require. These include the EDI 830 Planning Schedule and EDI 862 Shipping Schedule, which are critical for MRP planning and just-in-time production.

Other integrated EDI documents include:

- ▶ A detailed 856 Advance Shipment Notification (ASN)
- ▶ Warehouse/3PL documents (940, 943, 944 and 945)
- ▶ Sales documents (850 Purchase Order, 860 Purchase Order Change, 810 Invoice, 855 PO Acknowledgment)
- ▶ EDI 846 Inventory Inquiry/Advice
- ▶ EDI 875 Grocery Products Purchase Order and EDI 880

STREAMLINE ORDER FULFILLMENT

When you integrate TrueCommerce EDI with Infor VISUAL, you can automatically create outbound invoices (EDI 810) and ASNs (EDI 856) documents from inbound purchase orders (EDI 850) and send them using EDI.

EDI 830 Planning Schedule, EDI 862 Shipping Schedule and other supported documents can also be imported from Infor VISUAL directly into your EDI solution; avoiding the need to manually rekey data.

Remote warehouse integration helps automate communication with third-party logistics (3PL) providers to fulfill orders faster and more accurately. TrueCommerce EDI can convert purchase orders into warehouse shipping orders (940) while integrating the warehouse shipping advice (945) with Infor VISUAL to automatically create invoices.

EMBEDDED, CUSTOMIZABLE INTEGRATION ENHANCES EASE OF USE

The TrueCommerce EDI solution is embedded directly within your Infor VISUAL application and mirrors its interactive look-and-feel, for enhanced usability and a shorter learning curve.

Because every Infor VISUAL system is configured for specific business needs, the TrueCommerce EDI solution also offers a high degree of flexibility and customization potential to help you maximize process efficiency.

BUILT-IN PROCESS CONTROLS

Built-in process controls ensure that required data requested by your customer has been entered correctly, and will notify you of invalid fields prior to sending your outbound transactions. TrueCommerce EDI automatically verifies that items on incoming orders, including the unit price, are matched to your data in Infor VISUAL. Also, when you create an invoice in Infor VISUAL, TrueCommerce EDI checks that both the customer ID and item number fields are valid. These automated safeguards help to eliminate chargebacks from customers and reduce the turnaround time on orders by ensuring that all EDI documents sent to your customers are complete.

CUSTOM FIELDS INTEGRATION

TrueCommerce EDI supports integration for custom fields of your choice. While a number of data fields can be integrated, shipment and delivery dates might illustrate essential data that is important when processing your documents. Regardless of which fields or data type you would like to integrate as custom fields, TrueCommerce EDI will automatically recognize and populate those fields; eliminating the need to manually re-key that data each time.

SOFTWARE ADD-ONS

TrueCommerce Scheduler™ further enhances this easy-to-use, integrated EDI solution by automatically performing send and receive functions for the integrated transactions that you specify. In addition, the TrueCommerce Shipping Module simplifies shipping with FedEx, UPS and other leading carriers by creating a seamless connection between your shipping system and TrueCommerce Transaction Manager. Another valuable software add-on are the TrueCommerce Packing Lists. The packing lists option manages all packing lists templates for each of your customers, making it easy to meet their demands. Since packing lists can be printed directly from Transaction Manager, it eliminates the need to login and print from multiple systems. These popular add-ons will save you significant time and reduce manual effort, so you can focus on other important business functions.

AN END-TO-END EDI SOLUTION FOR INFOR VISUAL FROM ONE RELIABLE SOURCE

Easy to Use

- As intuitive to use as email
- Point-and-click functionality
- Requires minimal training to get started
- Includes a step-by-step user's guide
- Backed by free support!

Connects to Any Trading Partner

- Including those requiring the use of AS2 or a specific Value Added Network (VAN)
- Over 23,000 trading partner mappings and growing
