

EDI in the Cloud for QuickBooks Pro, Premier & Enterprise

We Make EDI Painless!

TrueCommerce® EDI Solutions makes it painless to implement electronic data interchange (EDI) by delivering easy-to-use, robust and affordable solutions.

- ▶ TrueCommerce Transaction Manager™ is the only EDI solution designated by Intuit as "Preferred" for QuickBooks Enterprise Solutions
- ▶ Complete, end-to-end EDI solution for QuickBooks Pro, Premier and Enterprise from one reliable source
- ▶ Supports more than 92,000 trading partner maps with updates at no additional charge
- ▶ Unlimited, US-based support, free software updates, no annual contracts and no maintenance fees

COMPLETE SOLUTION FROM ONE SOURCE

Our unique modular approach enables us to offer a true end-to-end EDI solution that is easy to use and unparalleled in scalability. We've taken the complexity out of implementing EDI by providing all four of the components you need to successfully deploy EDI:

Connectivity with your trading partner(s) is required to transmit EDI documents, whether directly via the Internet or through a "Value Added Network," or VAN. The TrueCommerce Trading Network (VAN) is our Internet-based transaction gateway, across which your EDI transactions are transmitted, providing connectivity with all of your trading partners. It is compliant with virtually any connectivity protocol, including AS1/AS2/AS3, FTP and (if required) VAN interconnects.

Web-based EDI Translation Software, TrueCommerce Transaction Manager, is our user-friendly translation software that converts business documents from raw EDI data (ANSI ASC X12 and EDIFACT standard) into a human-readable business form. TrueCommerce Transaction Manager can be deployed as on-premise software or as a web-based (SaaS) deployment hosted by TrueCommerce.

Data Mapping and Integration provide the ability to seamlessly send and receive information between Transaction Manager and QuickBooks through the TrueCommerce Business System Plug-In™.

This is achieved by processing EDI transactions through a collection of intelligent software modules. These modules are programmed to format your inbound EDI transactions to match against your configurations within QuickBooks as well as match your outbound transactions against your trading partner's requirements. As your business grows and you acquire new customers, additional trading partner maps can easily be added and seamlessly integrated with your TrueCommerce solution.

Support is a critical component of a complete, end-to-end EDI solution. Our Professional Services team has the broad range of expertise to handle not only all of your trading partners' requirements, but also any technical issues related to business system integration and the sending and receiving of your EDI documents. You can also count on the support team to provide the advice and guidance you'll need to be successful. Even if you aren't familiar or comfortable with EDI, we'll be there to help you get up and running, step by step.

"If you could describe a person as 'user-friendly' that's how I'd describe the folks we worked with at TrueCommerce."

Owner, Fresh Meal Solutions, Inc.

Truecommerce EDI Solutions

TrueCommerce Professional Services & Support

ENHANCE PRODUCTIVITY AND REDUCE COSTS BY INTEGRATING EDI WITH QUICKBOOKS PRO, PREMIER OR ENTERPRISE

EDI is more than a way to comply with customer requirements. By integrating EDI with your business system, you can eliminate time-consuming, error-prone manual tasks, to accelerate key business processes and improve supply chain visibility.

Integrating your EDI solution with QuickBooks reduces the need to print or re-enter transactions, which makes order processing faster and more efficient without sacrificing accuracy. TrueCommerce Transaction Manager offers powerful sales order, remote warehouse and purchasing integration that's proven, affordable and easy-to-use – enabling you to meet all of your trading partners' EDI requirements.

“PREFERRED” BY INTUIT

TrueCommerce has been providing integrated EDI services to QuickBooks customers for over fifteen years, and is the only EDI solution selected by Intuit as “Preferred” for use with QuickBooks Enterprise Solutions. TrueCommerce has also earned Intuit's prestigious Gold Developer status for QuickBooks Pro and Premier. QuickBooks users can trust HighJump TrueCommerce to meet their needs both today and into the future.

WEB-BASED OR ON-PREMISE EDI

The choice of a web-based, integrated EDI solution hosted by TrueCommerce, offers QuickBooks users the advantage of anytime/anywhere access, with no maintenance, backup or update responsibilities. You can also choose an on-premise deployment; both options deliver identical features and functionality.

STREAMLINE ORDER FULFILLMENT

When you integrate TrueCommerce Transaction Manager with QuickBooks, you can automatically create sales orders and invoices from inbound purchase orders (850), enabling you to quickly send outbound invoices (810) to your customers using EDI. Credit memos can also be imported from QuickBooks, directly into your EDI solution; avoiding the need to manually rekey data. In addition, support for importing remittance advices (820) into QuickBooks is available separately, adding value by automatically reconciling your invoices paid within QuickBooks.

Our remote warehouse integration can automate communication with third-party logistics (3PL) providers to fulfill orders faster and more accurately. Transaction Manager will convert sales orders into warehouse shipping orders (940) while integrating the warehouse shipping advice (945) with QuickBooks to automatically create invoices.

AVAILABLE PURCHASING INTEGRATION

TrueCommerce makes it easier to connect with your suppliers and manage your business through the support of integrated outbound purchase orders and inbound invoices. Additionally, the inbound invoice can automatically generate bills within QuickBooks.

BUILT-IN PROCESS CONTROLS

Built-in process controls ensure that required data requested by your customer has been entered correctly, and will notify you of invalid fields prior to sending your outbound transactions. TrueCommerce Transaction Manager automatically verifies that items on incoming orders, including the unit price, are matched to your data in QuickBooks. Also, when you create a sales order in QuickBooks, TrueCommerce Transaction Manager checks that both the customer ID and item number fields are valid. These automated safeguards help to eliminate chargebacks from customers and reduce the turnaround time on orders by ensuring that all EDI documents sent to your customers are complete.

CUSTOM FIELDS INTEGRATION

TrueCommerce Transaction Manager supports integration for custom fields of your choice. While a number of data fields can be integrated, shipment and delivery dates might illustrate essential data that is important when processing your documents. Regardless of which field or data type you would like to integrate as a custom field, Transaction Manager will automatically recognize and populate those fields; eliminating the need to manually re-key that data each time.

SOFTWARE ADD-ONS

TrueCommerce Scheduler™ further enhances this easy-to-use, integrated EDI solution by automatically performing send and receive functions for the integrated transactions that you specify. In addition, the TrueCommerce Shipping Module simplifies shipping with FedEx, UPS and other leading carriers by creating a seamless connection between your shipping system and TrueCommerce Transaction Manager. Another valuable software add-on are the TrueCommerce Packing Lists. The packing lists option manages all packing lists templates for each of your customers, making it easy to meet their demands. Since packing lists can be printed directly from Transaction Manager, it eliminates the need to login and print from multiple systems. These popular add-ons will save you significant time and reduce manual effort, so you can focus on other important business functions.

AN END-TO-END EDI SOLUTION FOR QUICKBOOKS PRO, PREMIER AND ENTERPRISE FROM ONE RELIABLE SOURCE**Easy to Use**

- As intuitive to use as email
- Point-and-click functionality
- Requires minimal training to get started
- Includes a step-by-step user's guide
- Backed by free support!

Connects to Any Trading Partner

- Including those requiring the use of AS2 or a specific Value Added Network (VAN)
- Over 92,000 trading partner mappings and growing

Robust Functionality

- Supports any ANSI ASC X12 or EDIFACT transaction
- Available as an on-premise or web-based version of Transaction Manager
- Item ID translation tables and default information lookup tables reduce or eliminate manual data entry
- Automatically send, receive and view acknowledgments confirming receipt of transactions

Offers Unbeatable Business Value

- Annual network savings of 30% to 50% compared to other EDI solutions offering comparable functionality
- No annual subscription or maintenance fees
- No annual contract required or early termination fees
- No AS2 license fees, mailbox fees, peak hour surcharges, delimiter conversion fees or other hidden service fees
- Free software updates! If your trading partner changes a specification or adds a transaction, we'll update your data mapping at no charge
- Free unlimited US-based support
