

# TRUECOMMERCE EDI SOLUTIONS MAKES PURCHASING INTEGRATION PAINLESS FOR SAGE 300

## We Make EDI Painless!

TrueCommerce EDI Solutions makes it painless to implement electronic data interchange (EDI) by delivering easy-to-use, robust and affordable solutions.

## BENEFITS

- TrueCommerce is the only EDI solution endorsed and exclusively distributed by Sage
- Complete, web-based EDI solution for Sage 300 from one trusted source
- More than 12,000 companies improve business productivity daily with the TrueCommerce Trading Network
- Supports more than 23,000 trading partner maps with updates at no additional charge

**TrueCommerce Transaction Manager™** for Sage 300 makes it easy and affordable to transact EDI with your suppliers, while making your business more efficient at the same time. The only solution endorsed and exclusively distributed by Sage, it includes everything you need to streamline and automate purchase order processing so you can place orders faster without sacrificing accuracy. The easy-to-use interface and robust integration ensure smooth alignment with current business processes.

Comprehensive integration with the Sage 300 purchase order module (including outbound purchase orders, updates of purchase orders, inbound receipts and inbound invoice transactions) makes exchanging information between Sage 300 and your TrueCommerce EDI solution seamless. Purchase orders, purchase order acknowledgments, shipments and invoices become fully integrated across these key systems, eliminating time-consuming manual effort.

TrueCommerce Transaction Manager automates many everyday tasks, like updating Sage 300 purchase orders from suppliers' order acknowledgements, importing inbound advance ship notices (ASNs) to receive against the original purchase order, and creating a receipt of invoice upon importing an invoice. In addition, built-in process controls improve procurement efficiency by ensuring that key fields on your outbound EDI documents are valid and complete before sending them to suppliers.

The TrueCommerce Scheduler add-on makes this easy-to-use purchasing solution even more efficient. TrueCommerce Scheduler automatically performs import and export functions for the integrated transactions that you specify. Scheduling automated transactions at a time that best fits your business needs saves you time and reduces manual steps, so you can focus on other important tasks.

## TRUECOMMERCE TRANSACTION MANAGER FEATURES AND BENEFITS FOR SAGE 300

### Efficient Integration Your Business Can Rely On:

- The TrueCommerce EDI solution integrates purchase order, purchase order update, receipts and receipt of invoice transactions with Sage 300.
- This integration leverages Sage 300's SDK—the approach Sage recommends for the tightest and most robust integration, including native support for Sage 300 business logic.
- You can import or export integrated documents between Sage 300 and the TrueCommerce EDI solution in one click—or automate these tasks with TrueCommerce Scheduler.
- TrueCommerce EDI works with all the supported versions of Sage 300.

### Advanced Purchasing Integration Streamlines Collaboration with Suppliers:

- The EDI system automatically imports inbound ASNs into Sage 300 to receive against the original purchase order, saving time and reducing manual effort.
- You can create multiple shipments against a single purchase order, helping you to track items shipped versus items you are still expecting.
- Inbound invoices can optionally create a receipt of invoice document automatically, enhancing efficiency and ensuring accuracy.

- You can assign your EDI shipments and invoices into batches when processing your receipt of goods and invoice documents.
- Update purchase orders from inbound purchase order acknowledgments from suppliers to keep track of order status.
- Transaction Manager can add lot and serial data to Sage 300 when creating a receipt, if needed.
- When Transaction Manager creates an invoice in Sage 300, it checks for duplicate invoices and then automatically compares the EDI unit cost with the Sage unit cost. If they compare unequal you can assign either the Sage or EDI price, or prevent the invoice from being created.
- Purchase orders imported from Transaction Manager into Sage 300 are automatically validated against supplier requirements or purchase order maps, to ensure accuracy.

### Built-in Process Controls Reduce Errors and Accelerate Order Processing:

- The TrueCommerce solution automatically ensures that all fields are valid before sending a transaction, and alerts you to invalid fields. Items shipped and invoiced are automatically validated against the original purchase order.

## ABOUT TRUECOMMERCE

TrueCommerce gives your business a competitive edge with simple, adaptable and cost-effective solutions that harness the power of our trading partner community. From the factory to the warehouse, from distributor to retail storefront, achieve new levels of business connectivity and performance from the world's most complete network.

Connect. Integrate. Accelerate.
