

Sage 300 EDI in the Cloud for Sales Order Processing Integration

Exclusively Endorsed by Sage

BENEFITS

- Integration leverages the native Sage API for optimal performance and scalability
- EDI translator, mapping, network services and support required to successfully implement EDI are included in this proven, single-vendor solution
- Supports more than 92,000 trading partner maps with updates at no charge
- Unlimited US-based support, no annual maintenance fees, free software upgrades and no annual contracts

TRUECOMMERCE TRANSACTION MANAGER FOR SAGE 300 MAKES IT EASY AND AFFORDABLE TO COMPLY WITH YOUR CUSTOMERS' EDI REQUIREMENTS.

TrueCommerce is the only EDI solution endorsed and exclusively distributed by Sage for Sage 300. A solution that is "endorsed by Sage" has passed a rigorous evaluation including strategic, technological and integration criteria. Endorsed solutions are certified to work with Sage's latest releases, and is from an organization that meets Sage's requirement of delivering an "exceptional customer experience."

This robust, web-based integration includes everything you need to streamline and automate sales order processing and warehouse document integration. The intuitive interface, low total cost of ownership and flexible configuration options help you maximize efficiency and customer satisfaction—liberating your business to focus on new opportunities!

TrueCommerce Transaction Manager for Sage 300 automates many everyday tasks, like creating sales orders in Sage 300 or sending invoices to your customers. Built-in process controls ensure that unit pricing, duplicate purchase order numbers and items are validated before processing transactions to Sage 300. If invalid fields exist upon sending, you will be alerted before your document is received by the trading partner, helping to eliminate chargebacks from your customers and reduce turnaround time on orders.

The solution fully supports advance shipping notices (ASNs), including flexible auto-pack options specific to the customer or the item. TrueCommerce automatically updates trading partner mappings at no charge, so you're always up-to-date with trading partner requirements.

The TrueCommerce Scheduler™ further enhances this robust solution. This software add-on automatically performs everyday tasks on your behalf at specific times, resulting in reduced effort and improved efficiency.

TRUECOMMERCE TRANSACTION MANAGER FEATURES AND BENEFITS FOR SAGE 300

Advanced EDI Integration with the Sage 300 Sales Order Module Streamlines Transactions and Reduces Effort:

- Integration includes sales order, shipment and invoice transactions, along with advance ship notices (ASNs) and purchase order acknowledgements.
- Purchase order acknowledgements can be created automatically from sales orders in Sage 300 ERP
- Advance ship notice (ASN) integration includes the ability to auto-pack shipments by quantity for key customers based on specific packaging rules.
- Built-in shipment module makes it easy to package shipments and create ASNs. Leverage the auto-pack function to automatically package the shipments based on customer or item-packaging rules.
- TrueCommerce EDI Labeling, an optional add-on, easily creates and prints GS1-128 labels (formerly UCC-128) to meet customer needs and streamline your shipping processes.
- Transaction Manager's multi-company support lets businesses transact EDI through multiple companies in Sage 300, while making it easy to set up and define trading partners to interact with specific companies outlined in Sage 300.

Warehouse Integration Automates Your Communications with 3PL Providers:

- Integrates outbound sales orders and inbound shipments for faster, more accurate order fulfillment with your third party logistics company.
- Automatically create warehouse shipping orders from incoming sales orders, and in turn the warehouse shipping advice will create the order entry shipment within Sage 300.
- View packaging data from the warehouse shipping advice in Sage 300 through the embedded ASN module.
- Creates outbound advance ship notices from inbound shipment documents – no need to print or re-enter data.
- Generate shipments within Sage 300 from inbound shipment documents, including the package details.
- Update lot numbers and serial numbers automatically from inbound shipments to save time and reduce errors.

Built-in Process Controls Ensure Data Integrity, Reduce Errors and Minimize Chargebacks:

- Fields are validated prior to sending transactions, and alerts are provided to highlight those fields with missing data, helping to optimize turnaround time on orders.
- Unit pricing, duplicate purchase order numbers and items are automatically validated before processing transactions to Sage 300.
- Data exchanges between Sage 300 and your TrueCommerce EDI Solution can be scheduled and automated with TrueCommerce Scheduler to further automate integrated EDI transactions.
