

TRUECOMMERCE EDI SOLUTIONS MAKES PURCHASING INTEGRATION PAINLESS FOR SAP BUSINESS ONE

BENEFITS

- ▶ SAP Certified Partner for SAP Business One
- ▶ Total EDI solution for SAP Business One from one trusted source, including purchasing, warehouse, and sales integration
- ▶ All-in-one solution for manufacturers, distributors and other businesses that want to streamline supply chain processes end-to-end
- ▶ More than 4,500 companies improve business productivity daily with the TrueCommerce Trading Network
- ▶ Supports more than 4,000 trading partner maps with updates at no additional charge

TrueCommerce Transaction Manager™ for SAP Business One makes it easy and affordable to transact EDI with your suppliers, while making your business more efficient at the same time. This certified solution includes everything you need to streamline and automate purchase order processing so you can place orders faster without sacrificing accuracy. The easy-to-use interface and robust integration ensure smooth alignment with your business processes.

Comprehensive purchasing integration with SAP Business One (including purchase order, goods receipt and A/P invoice transactions) makes exchanging information between SAP Business One and your TrueCommerce EDI solution seamless. Purchase orders, shipments and invoices can be imported and exported automatically between Transaction Manager and SAP Business One, eliminating manual effort and reducing errors related to rekeying data.

TrueCommerce Transaction Manager automates many everyday tasks, like importing inbound advance ship notices (ASNs) to create goods receipts against the original purchase orders, and A/P invoices upon importing invoices. In addition, built-in process controls ensure that key fields on your outbound EDI documents are complete before sending those transactions to suppliers—helping to minimize or eliminate errors.

The TrueCommerce Scheduler add-on further enhances this easy-to-use purchasing solution. TrueCommerce Scheduler automatically performs import and export functions for the integrated transactions that you specify. Scheduling automated transactions at a time that best fits your business needs saves you time and reduces manual effort, so you can focus on other important business processes.

TRUECOMMERCE TRANSACTION MANAGER FEATURES AND BENEFITS FOR SAP BUSINESS ONE

Seamless Integration Your Business Can Rely On:

- ▶ The TrueCommerce EDI solution includes integration for purchase orders (PO), goods receipt PO, and A/P invoices with the SAP Business One purchasing module.
- ▶ Header and transactions can be updated (i.e., ship date, delivery date, or ship from data), as well as the line item level data via the purchase order acknowledgment.
- ▶ Tight integration with your business documents eliminates the need to print or re-enter data.
- ▶ You can import or export data between SAP Business One and the TrueCommerce EDI solution in one click—or use TrueCommerce Scheduler to set up these functions automatically, without user intervention.

Advanced Purchasing Integration Streamlines Collaboration with Vendors:

- ▶ The EDI system automatically imports inbound advance ship notices (ASNs) into SAP Business One to receive against the original purchase order, and creates a goods receipt PO, saving time and reducing manual effort.
- ▶ You can create multiple goods receipts against a single purchase order, helping you to track items shipped versus items you are still expecting.
- ▶ Outbound EDI purchase orders are automatically created from SAP Business One purchase orders.
- ▶ Inbound EDI invoices automatically create an A/P Invoice in SAP Business One, saving time and reducing errors.

Built-in Process Controls Reduce Errors and Accelerate Order Processing:

- ▶ The TrueCommerce translation software automatically ensures that all fields are valid before sending a transaction, and alerts you to invalid fields. Items shipped and invoiced are automatically validated against the original purchase order.

- ▶ Vendor pricing can be validated when you create an A/P Invoice automatically comparing the EDI unit cost with the unit cost on the SAP Business One purchase order. Options include an error notification if the cost is different, or assigning the SAP Business One unit cost.
- ▶ Purchase orders imported from Transaction Manager into SAP Business One are automatically validated against supplier requirements or purchase order maps, to ensure accuracy.

“Scheduling automated transactions at a time that best fits your business needs saves you time and reduces manual effort, so you can focus on other important business processes.”

Truecommerce EDI Solutions
