SAP®

Integrated EDI in the Cloud for SAP Business One

Complete Solution From One Source

Our unique modular approach enables us to offer a true end-to-end EDI solution that is easy to use and unparalleled in scalability. We've taken the complexity out of implementing EDI by providing all four of the components you need to successfully deploy EDI:

Connectivity with your trading partner(s) is required to transmit EDI documents, whether directly via the Internet or through a "Value Added Network," or VAN. The TrueCommerce Trading Network (VAN) is our Internet-based transaction gateway, across which your EDI transactions are transmitted, providing connectivity with all of your trading partners. It is compliant with virtually any connectivity protocol, including AS1/ AS2/ AS3, FTP and (if required) VAN interconnects.

Web-based EDI Translation Software, TrueCommerce Transaction Manager, is our user-friendly translation software that converts business documents from raw EDI data (ANSI ASC X12 and EDIFACT standard) into a human-readable business form. TrueCommerce Transaction Manager can be deployed as on-premises software or as a web-based (SaaS) deployment hosted by TrueCommerce.

Data Mapping and Integration provide the ability to seamlessly send and receive information between Transaction Manager and SAP Business One through the TrueCommerce Business System Plug-In™. This is achieved by processing EDI transactions through a collection of intelligent software modules. These modules are programmed to format your inbound EDI transactions to match against your configurations within SAP Business One as well as match your outbound transactions against your trading partner's requirements. As your business grows and you acquire new customers, additional trading partner maps can easily be added and seamlessly integrated with your TrueCommerce solution.

Support is a critical component of a complete, end-to-end EDI solution. Our team has the broad range of expertise to handle not only all of your trading partners' requirements, but also any technical issues related to business system integration and the sending and receiving of your EDI documents. You can also count on the support team to provide the advice and guidance you'll need to be successful. Even if you aren't familiar or comfortable with EDI, we'll be there to help you get up and running, step by step.

Key Benefits

End-to-end EDI solution for SAP Business One, developed and supported by one trusted source

An unequaled range of commerce solutions, including EDI, digital marketplace and storefront integrations, fulfillment automation and much more

SAP Certified integration from an SAP partner

Comprehensive, seamless integration automates sales orders, invoices, purchase order acknowledgments, credit memos, and advance shipping notices (ASNs)

Offers easy set-up and simple, customer-specific, configuration

Powerful auto-pack capabilities automate the packaging within the SAP delivery packing slip TrueCommerce is the most complete way to connect your business across the supply chain – from EDI to marketplaces to fulfillment and more

TrueCommerce Transaction Manager Features and Benefits for SAP Business One

Advanced Integration for Unbeatable Efficiency and Customer Satisfaction:

- Integration leverages SAP Business One's native Data Interface API (DI API) to ensure data integrity while reducing errors, and minimizing chargebacks

Advanced EDI Integration with the SAP Business One Sales Order Module Streamlines Transactions and Reduces Effort:

- Integration includes sales order, delivery and invoice transactions; as well as related documents like sales quotations, purchase order acknowledgements, credit memos and draft invoices
- Advance ship notice (ASN) integration supports no pack, pick and pack, and standard ASN formats, as well as consolidated ASNs
- Auto-pack shipments by quantity for key customers based on specific packaging rules. Supports mixed carton, drop-ship and pure carton options
- Streamline your shipping process and meet customer requirements by printing UCC-128 labels directly from SAP with the TrueCommerce EDI Labeling add-on
- Item, partner and address sync makes it easy to associate SAP data to EDI partners, and to automatically sync items by UPC
- Supports SAP user defined fields

Free up internal resources and focus on your core business with TrueCommerce's game-changing fully managed EDI service

Read our EDI Datasheet

Warehouse Integration Automates Your Communications with 3PL Providers:

- Integrates outbound warehouse shipping orders (940), which can be processed automatically from a sales order in SAP Business One and can optionally include lot numbers and serial numbers
- Integrated inbound warehouse shipping advices (945) automatically create Deliveries in SAP Business One, including the package and UCC-128 label details for faster, more accurate order fulfillment and also can automatically update lot numbers and serial numbers
- The warehouse shipping advice can be used to automatically develop the advance ship notice, giving you the ability to perform a quick turnaround and immediately send ASNs to your customers
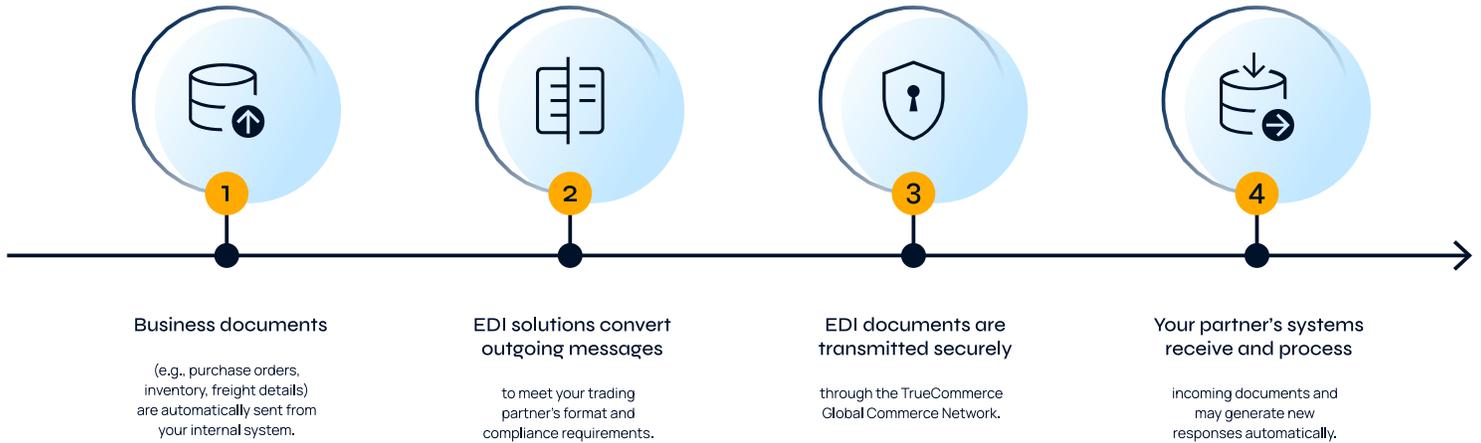

Automate Everyday Tasks

Import and export EDI transactions at scheduled times with the TrueCommerce Scheduler™ add-on. To meet partners' labeling and packing requirements with one solution, the TrueCommerce Labeling add-on automates creation of UCC/GS1-128 compliant, barcoded labels, with label and packing list template updates included free. To integrate EDI with popular shipping systems like FedEx and UPS, choose the TrueCommerce Shipping Module.

Custom Fields Integration

TrueCommerce Transaction Manager supports integration for custom fields of your choice. While many data fields can be integrated, shipment and delivery dates might show essential data important when processing documents. Regardless of which field or data type you would like to integrate as a custom field, Transaction Manager will automatically recognize and populate those fields; eliminating the need to manually re-key that data each time.

How EDI Works

With EDI, you can automate the many steps involved in order processing form the initial purchase order, to ASNs and shipping updates, to invoices, and more. Here's how.

1 Business documents

(e.g., purchase orders, inventory, freight details) are automatically sent from your internal system.

2 EDI solutions convert outgoing messages

to meet your trading partner's format and compliance requirements.

3 EDI documents are transmitted securely

through the TrueCommerce Global Commerce Network.

4 Your partner's systems receive and process

incoming documents and may generate new responses automatically.

EDI is Just the Beginning!

SAP Business One users need to move more data faster across more channels, maximize automation and eliminate manual effort. As the most complete way to connect your business across the supply chain, TrueCommerce offers an unrivaled choice of integrations and value-added capabilities.

Connect to Marketplaces—Including Amazon

Connect SAP Business One to leading online marketplaces like eBay, Walmart, Google, AliExpress and nearly 100 other top marketplaces globally. Automatically exchange order, fulfilment, customer and inventory data between marketplaces and SAP Business One—no more retyping. TrueCommerce can also integrate SAP Business One with Amazon Seller Central or Vendor Central to move order and inventory data back-and-forth automatically between Amazon and SAP Business One.

Connect to Storefronts

Connect SAP Business One to leading online storefronts, including Shopify, Magento, and WooCommerce. Process online orders in minutes and automatically update pricing and inventory between your online store and SAP Business One.

Integrate with Retailer APIs

Connect directly with your trading partners' API platforms. Our API integration lets you exchange data in real-time for increased accuracy, higher performance, faster order processing, and lower costs. Keep inventory up-to-date with inventory feed automation and enjoy fully supported map updates for ongoing compliance.
