EDI for Microsoft Dynamics NAV

Eliminate manual entry, streamline the order to cash process and gain seamless access to your trading partners; without the need for multiple platforms.

TrueCommerce™ | Do business in every direction

Optimise and streamline your operations

In today's increasingly competitive corporate landscape it's essential for businesses to maximise internal efficiencies to give themselves the best chance of success. Manual processes such as retyping orders into your Dynamics NAV environment often results in errors and delays that diminish the customer experience and can negatively impact your bottom line.

TrueCommerce EDI integration for Microsoft Dynamics NAV enables you to automate the transferal of messages from your EDI solution through to your NAV system, removing manual processes and allowing you to manage your trading partner relationships from a central location, rather than logging into multiple web portals.

Key Benefits of the Microsoft Dynamics NAV integration:

Remove manual processes from your supply chain

Automate the flow of messages between your ERP and EDI solution, enabling you to redeploy valuable resource into more strategic areas of the business.

Comply with your trading partners' requirements

Achieve compliance with the automated conversion of EDI messages to and from your trading partners required standards.

Improve customer service

Underpin your message automation with stringent business rules and advanced error checking to improve message accuracy and ensure you never miss a trading deadline.

Fully Managed Service

Specialists manage the onboarding, set up, and maintenance of partner connections with no local hardware or software required.

NAV Business Logic

Leverage existing business logic and processes supported by NAV and benefit from a seamless order to cash process.

Full Compatibility

Benefit from an embedded EDI module, built exclusively for NAV, with seamless connectivity into TrueCommerce's trading partner network.
