

TrueCommerce Embedded EDI Microsoft Dynamics 365 for Operations Accounts Payable

BENEFITS

**More Connected. More Supported.
More Prepared for What's Next.**

- Single connection to Dynamics 365 provides seamless access to TrueCommerce's global trading partner community
- End-to-end solution approach offers a complete solution, implemented and managed by one, trusted and experienced provider
- Embedded Dynamics 365 solution aligns EDI processing with the business users that manage supply chain relationships, reducing impact on IT resources
- Built in X++ to extend Dynamics 365 for EDI workflows, TrueCommerce offers the tightest level of integration
- Rapid deployment via Lifecycle Services allows for a quick and easy installation

FAMILIAR DYNAMICS 365 LOOK AND FEEL MINIMIZES TIME TO PRODUCTIVITY AND ENHANCES UTILITY

Built exclusively for Microsoft Dynamics 365 for Operations, deployed using Lifecycle Services, TrueCommerce offers the highest level of flexibility as it relates to EDI document integration, accommodating your unique Dynamics 365 environment, and scaling with your business. When working with Microsoft to design our solution, TrueCommerce applied Microsoft's best of breed approach to deliver high volume throughput allowing for multi-threaded processing versus a linear approach commonly deployed.

TrueCommerce offers a truly embedded EDI solution, built within the native Dynamics 365 platform, that your team will find easy to implement. TrueCommerce extends Dynamics 365 entities to offer turnkey support within Dynamics 365 for complex EDI workflows including order-to-cash, transportation and logistics processes.

TrueCommerce EDI for Dynamics 365 makes it easy and affordable to comply with your supplier requirements while making your business more efficient at the same time. This end-to-end, seamless solution includes everything you need to streamline and automate your accounts payable process so you can place orders faster without sacrificing accuracy. Purchase orders, shipments and invoices become fully integrated, eliminating the need to print or re-enter transactions.

Built-in process controls notify you when fields are invalid, improving business efficiencies and reducing turnaround time on orders. These same controls also ensure that key fields on your outbound EDI documents are complete before sending those transactions to your supplier.

 Preferred solution

ROBUST PURCHASING INTEGRATION STREAMLINES SUPPLIER COLLABORATION

- Integrates your TrueCommerce EDI solution for purchase order, shipment and invoicing transactions within Dynamics 365
- Validates purchase orders against supplier requirements or purchase order maps, to ensure accuracy
- Automatically imports inbound advance ship notifications into Dynamics 365 to receive against the original purchase order, which saves time and reduces manual effort
- Supports creation of multiple shipments against one purchase order
- Inbound invoices are matched to the appropriate order(s) and receipt(s)
- Items shipped and invoiced are validated against the purchase order
- Provides alerts when the invoice price does not match the purchasing price

BUILT-IN PROCESS CONTROLS REDUCE ERRORS

- All data import/export tasks between Dynamics 365 and your TrueCommerce EDI solution can be automated and scheduled; no user interaction is required
- Ensures that all required data has been entered and is valid before sending EDI transactions to your supplier

- Enables you to cross-reference your supplier data with data stored in Dynamics 365

ADDITIONAL BENEFITS

- Exceptional error checking and automated data transformations streamline processing and reduce costs associated with the procure-to-pay process
- TrueCommerce offers flexible deployment models including on-premises based connectivity and translation or a fully-hosted model
- Depth and flexibility to accommodate changes in the Dynamics 365 work flow without adding reprogramming requirements in the EDI solution
- Easy to learn and use – Our configurable solution adapts to your business processes, reducing the learning curve for end users

- Scalable, multi-company, multi-deployment architecture to manage and support the demands and complexity of enterprise EDI requirements

In a market survey conducted among 300 European retailers and manufacturers in August 2018, 95% of the companies surveyed reported that their EDI is partly or fully integrated to their ERP system.

Research Report: The Shifting Role of EDI Providers in Today's Fast Changing Supply Chain. Conducted by Vanson Bourne on behalf of TrueCommerce Europe, 2018.

TrueCommerce is the most complete way to connect your business across the supply chain, integrating everything from EDI, to inventory management, to fulfillment, to digital storefronts and marketplaces, to your business system, and to whatever comes next. To stay ahead in today's dynamic global market, companies need to be able to do business in a lot of different directions at once. For decades, TrueCommerce has helped businesses be more connected, more supported, and more prepared for what's next. Our Managed Service combines years of experience and world-class consultancy with a range of functionality for proactive monitoring. That's why thousands of companies rely on us.
