

# Integrated EDI for QuickBooks Online

**A complete, cloud-based EDI platform that streamlines document exchange and automates workflows for QuickBooks Online users.**

## **Growing EDI demands overwhelm QuickBooks Online users with manual work and compliance risk.**

QuickBooks Online users often struggle to keep pace with trading partner requirements as order volumes increase. Manual data entry, disconnected processes, and limited IT support lead to errors, delays, and costly compliance issues. Each new partner introduces unique mapping needs that add complexity and slow down order processing. The result is more time spent resolving discrepancies across sales, accounting, and fulfillment. To scale efficiently and meet customer expectations, QuickBooks Online users need an integrated, automated way to manage EDI without relying on manual steps or custom-built workflows.

## **A unified EDI platform that automates document exchange and ensures smooth integration with QuickBooks Online.**

TrueCommerce provides a fully integrated, cloud-based EDI solution built to automate document exchange for QuickBooks Online users. The platform centralizes connectivity, translation, and integration so purchase orders and invoices flow directly between trading partners and QuickBooks Online—without rekeying or manual reconciliation.

The TrueCommerce Trading Network ensures secure, standards-compliant transmission of all EDI documents, while Transaction Manager converts raw EDI into readable business documents. QuickBooks Online adapters apply partner requirements and align incoming and outgoing data with QBO fields for accuracy and consistency.

Because the solution is fully hosted, users avoid system maintenance, backups, and updates. TrueCommerce also manages trading partner maps, compliance changes, and onboarding as your business grows—giving QuickBooks Online users a scalable, low-effort foundation for EDI success.

## Key Capabilities Include:

Unified EDI platform for connectivity, translation, mapping, and ERP integration

Cloud-hosted architecture with no local maintenance

Transaction Manager for readable translation and partner compliance

QuickBooks Online adapters ensure proper field alignment

Secure transmission via the TrueCommerce Trading Network

Mapping that scales with your customer and partner base

U.S.-based support for implementation and ongoing optimization

## How Our EDI Platform Works

**1 Business documents**  
(e.g., purchase orders, inventory, freight details) are automatically sent from your internal system.

**2 EDI solutions convert outgoing messages**  
to meet your trading partner's format and compliance requirements.

**3 EDI documents are transmitted securely**  
through the TrueCommerce Global Commerce Network.

**4 Your partner's systems receive and process**  
incoming documents and may generate new responses automatically.

# Key Benefits

## 01

### Seamless QBO Integration

Automates the flow of purchase orders and invoices between EDI partners and QuickBooks Online to eliminate rekeying and maintain data accuracy.

## 02

### Faster Order Processing

Automatically convert inbound purchase orders into invoices, enabling quicker turnaround and consistent, compliant document exchange.

## 03

### Built-In Data Validation

Process controls verify required customer fields, item numbers, and unit pricing before sending documents, helping prevent chargebacks and discrepancies.

## 04

### Cloud-Based Convenience

A web-hosted platform offering anytime/anywhere access with no system maintenance or software upgrades required.

## 05

### Labeling & Packing Add-Ons

Print GS1-128 labels or customer-specific packing lists directly from Transaction Manager to meet trading partner requirements.

## 06

### Marketplace Expansion Support

Connect QuickBooks Online with 100+ marketplaces and storefronts, including Amazon, eBay, Walmart, Shopify, and more, for synchronized order, inventory, and fulfillment data.

TrueCommerce provides QuickBooks Online users with a modern, scalable EDI platform designed to eliminate manual effort and simplify partner communication. By centralizing connectivity, translation, mapping, and integration in one unified solution, businesses can streamline operations, improve accuracy, and meet trading partner requirements with confidence.

The platform's cloud-based architecture ensures continuous accessibility without maintenance or upgrade burdens. As trading partners add new requirements or your business expands into new channels, TrueCommerce manages map updates and compliance changes on your behalf, keeping your operations running smoothly.

With expert onboarding, ongoing U.S.-based support, and more than 180,000 trading partner maps available, TrueCommerce provides the foundation QuickBooks Online users need to reduce errors, accelerate order processing, and scale without additional headcount.

Whether you're connecting with major retailers, marketplaces, suppliers, or online storefronts, TrueCommerce enables seamless, accurate, and reliable EDI integration—helping your business stay efficient, compliant, and ready for growth.

## Features at a Glance

- Integrated purchase order and invoice workflows
- Automated creation of outbound invoices from inbound POs
- Built-in validation to prevent common data errors
- Support for GS1-128 labeling and packing list generation
- Connectivity to 100+ marketplaces and online channels
