INTUIT quickbooks

Integrated EDI for QuickBooks Pro, Premier & Enterprise

A scalable, end-to-end EDI platform that automates order processing and improves accuracy for QuickBooks Desktop users.

Manual workflows and rising EDI demands slow QuickBooks Desktop users and increase error risk.

QuickBooks Pro, Premier, and Enterprise users often face mounting pressure to meet trading partner EDI requirements while managing limited IT resources and manual workflows. Re-entering data across systems slows fulfillment, increases the risk of errors, and creates costly compliance issues. As order volumes grow—or new partners are added—mapping complexity and manual reconciliation consume time that teams can't spare. Without integrated EDI, QuickBooks Desktop users struggle to maintain accuracy, keep pace with partner expectations, and scale operations efficiently.

A unified EDI platform that streamlines document exchange and automates QuickBooks Desktop workflows.

TrueCommerce provides an integrated, cloud-enabled EDI solution designed to automate how QuickBooks Pro, Premier, and Enterprise users exchange documents with trading partners. The platform unifies connectivity, translation, mapping, and integration—

allowing sales orders, invoices, credit memos, and other documents to move between QuickBooks and partners without manual entry.

The TrueCommerce Trading Network manages secure, standards-compliant document exchange, while Transaction Manager converts raw EDI into readable business formats. QuickBooks Desktop adapters ensure every inbound and outbound transaction meets partner requirements and aligns to QuickBooks fields for consistent, accurate records.

With a web-based interface and support for QuickBooks WebConnect, users can access EDI anytime without on-premises maintenance. TrueCommerce also manages map updates, compliance changes, 3PL workflows, and supplier integrations—providing the scalability QuickBooks Desktop users need to grow without adding manual effort.

Key Capabilities Include:

Unified platform for connectivity, translation, mapping, and integration

Secure EDI transmission via the TrueCommerce Trading Network

QuickBooks Desktop adapters that align data fields and partner rules

Web-based access through Transaction Manager and WebConnect

Automated support for sales orders, invoices, credit memos, catalogs, and inventory updates
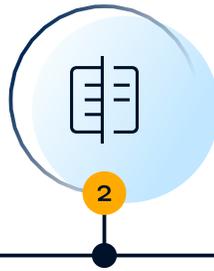

Seamless onboarding of new trading partners

U.S.-based support and ongoing compliance management

How our EDI Platform Works

1

Business documents

(e.g., purchase orders, inventory, freight details) are automatically sent from your internal system.

2

EDI solutions convert outgoing messages

to meet your trading partner's format and compliance requirements.

3

EDI documents are transmitted securely

through the TrueCommerce Global Commerce Network.

4

Your partner's systems receive and process

incoming documents and may generate new responses automatically.

Key Benefits

O1

Deep QuickBooks Integration

Automates creation of sales orders, invoices, credit memos, catalogs, and inventory documents directly inside QuickBooks.

O2

Faster Order Processing

Inbound POs automatically generate sales orders and invoices, speeding fulfillment and reducing manual rework.

O3

Warehouse & 3PL Connectivity

Automatically send 940 warehouse orders and receive 945 warehouse shipping advice back into QuickBooks to support accurate, timely fulfillment.

O4

Supplier Purchasing Automation

Outbound purchase orders and inbound invoices seamlessly integrate—allowing automatic bill creation and cleaner AP workflows.

O5

Built-In Data Validation

Verifies item numbers, customer IDs, pricing, and required fields before sending documents to prevent chargebacks and errors.

O6

Cloud-Enabled Access

Web-based architecture with QuickBooks WebConnect provides anywhere/anytime EDI access without server maintenance or upgrades.

TrueCommerce delivers a complete, scalable EDI solution that helps QuickBooks Pro, Premier, and Enterprise users reduce manual work, improve accuracy, and accelerate order processing. By centralizing connectivity, translation, mapping, and integration within one unified platform, businesses gain a seamless way to exchange documents with trading partners while maintaining fully synchronized QuickBooks data.

The cloud-based architecture provides the flexibility to access EDI from anywhere—without maintaining servers or managing updates. With automated sales order creation, invoice generation, purchasing integrations, and warehouse document exchange, QuickBooks Desktop users can streamline workflows and eliminate repetitive tasks that slow fulfillment and impact customer satisfaction.

TrueCommerce's support for more than 100 marketplaces, along with API and 3PL integrations, enables organizations to expand into new channels confidently. With managed trading partner maps, compliance updates, and U.S.-based support, businesses can rely on TrueCommerce to keep operations running smoothly as they grow.

For QuickBooks Desktop users looking to scale without additional headcount or complexity, TrueCommerce provides the proven EDI foundation needed to stay efficient, accurate, and competitive.

Features at a Glance

- Automated creation of sales orders, invoices, and credit memos
- Support for inventory (846) and catalog (832) documents
- Integrated 3PL workflows with 940/945 support
- QuickBooks WebConnect for cloud-style access
- Integration with 100+ marketplaces and storefronts
