Integrated EDI for Oracle NetSuite ERP

Overcoming Integration Challenges for Optimal Efficiency

Many organizations face challenges in managing the complexities of their supply chain, including integrating new trading partners, expanding sales channels, and navigating disparate systems. These challenges can result in missed revenue opportunities, delayed growth, and strained customer relationships. Limited scalability, manual processes, and inflexible solutions often lead to inefficiencies, increased costs, and diminished competitive edge. Addressing these pain points is critical for businesses looking to drive operational efficiency and meet evolving market needs.

Complete Solution From One Source

Our unique modular approach enables us to offer a true end-to-end EDI solution that is easy to use and unparalleled in scalability. We've taken the complexity out of implementing EDI by providing all four of the components you need to successfully deploy EDI:

Connectivity

- Connectivity with trading partners is required to transmit EDI documents, either directly via the Internet or through a Value Added Network (VAN).
- The TrueCommerce Trading Network can transmit EDI transactions to all global trading partners.
- Compliant with virtually any connectivity protocol, including AS1/AS2/AS3, FTP, and VAN interconnects (if required).

Web-Based EDI Translation Software

- TrueCommerce Transaction Manager™ is user-friendly, web-based (SaaS) translation software.
- Converts raw EDI data (ANSI ASC X12 and EDIFACT) into human-readable business documents.

Data Mapping and Integration

- Enables seamless data exchange between Transaction Manager and NetSuite via the TrueCommerce Business System Plug-In™.
- Intelligent software modules format inbound EDI transactions to match your NetSuite configurations.
- Outbound transactions are formatted to meet trading partner requirements.
- Easily add new trading partner maps as your business grows, fully integrating them into your TrueCommerce solution.

Support

- Professional Services team supports all trading partner requirements and technical integration issues.
- Assistance with sending and receiving EDI documents.
- Provides guidance for success, even if you are new to EDI.
- Step-by-step help to get you fully up and running.
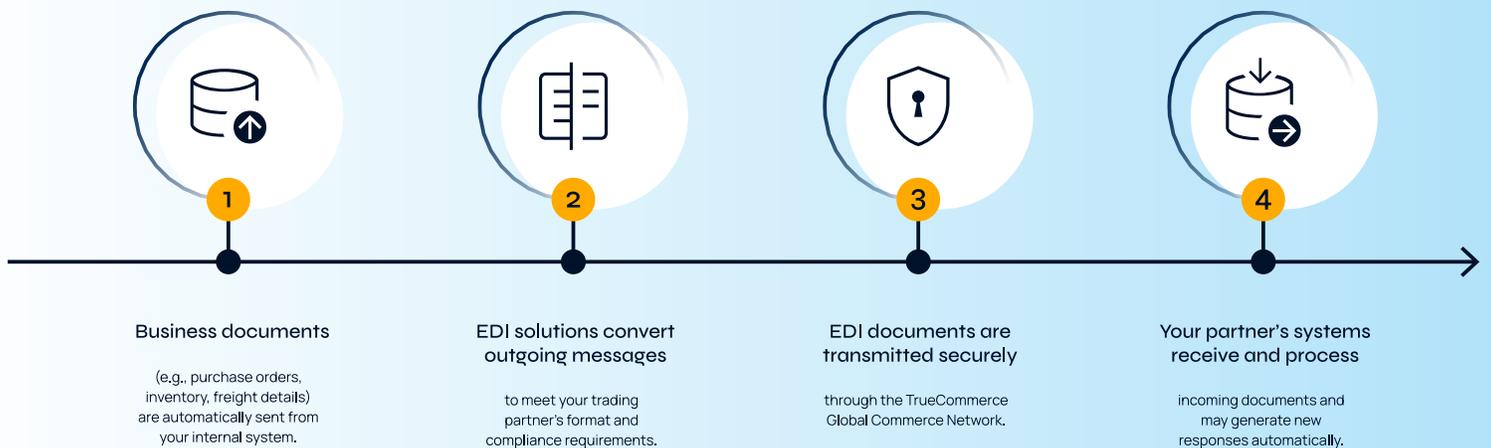

ERP Integration for Seamless Operations

- Pre-built ERP integration ensures compatibility with Oracle NetSuite ERP.
- Automates key business documents for order-to-cash (O2C), procure-to-pay (P2P), and 3PL logistics communications.
- Aligns with existing ERP workflows, preserving processes and data integrity.
- Scales with your business, supporting increased transaction volumes and new trading partners.

TrueCommerce Transaction Manager Features & Benefits for NetSuite

TrueCommerce Transaction Manager™ for NetSuite delivers robust, "Built for NetSuite" verified integration that automates EDI processes, improves accuracy, and enhances customer satisfaction. By leveraging SuiteTalk Web Services, built-in process controls, and powerful web-based add-ons, it streamlines order processing, logistics, and day-to-day tasks while preserving existing NetSuite workflows and data integrity.

How our EDI Platform Works

1

Business documents

(e.g., purchase orders, inventory, freight details) are automatically sent from your internal system.

2

EDI solutions convert outgoing messages

to meet your trading partner's format and compliance requirements.

3

EDI documents are transmitted securely

through the TrueCommerce Global Commerce Network.

4

Your partner's systems receive and process

incoming documents and may generate new responses automatically.

Why Choose EDI Integration with NetSuite

01

Robust Integration for Greater Efficiency & Customer Satisfaction

Leverages "Built for NetSuite" verification, supports SuiteCloud Plus threading, and includes POs (850/875), invoices (810/880), ASNs (856), PO Acks (855), and PO Changes (860). Supports 204, 210, 214, outbound 846/832, auto pack, packaging rules, and deep warehouse integration.

02

Integration with SuiteTalk Web Services

Uses direct-to-record SuiteTalk integration to eliminate secondary processes, unlock multithreading for high-volume transactions, and avoid NetSuite downtime. Enables simultaneous inbound/outbound processing, faster PO validation and invoicing, and secure connectivity without complex scripting.

03

Built-in Process Controls for Data Integrity & Fewer Chargebacks

Validates fields before sending transactions, alerting for missing data. Automatically checks unit pricing, duplicate PO numbers and items. Prevents inaccurate invoice rejection and leverages token-based authentication for secure connectivity.

04

High-Value, Web-Based Add-ons Streamline Order Processing

Automate data exchanges with TrueCommerce Scheduler. Create GS1-128 labels through TrueCommerce EDI Labeling™. Manage packing list templates with automatic updates. Supports outbound POs/PO changes and inbound acknowledgments, shipments, receipts and bills.

05

Automate Everyday Tasks

Schedule import/export of EDI transactions using TrueCommerce Scheduler. TrueCommerce Labeling automates creation of UCC/GS1-128 barcoded labels, with label and packing list template updates included free to meet partner requirements.

06

Seamless Integration with NetSuite's Ship Central

Automate ASNs by pulling shipment details directly from Ship Central, supporting No Pack, Standard, and Pick and Pack ASNs. Fits into existing workflows without custom integrations and streamlines shipping for users of 3G Pacejet or RF-SMART to ensure efficient, compliant fulfillment.

Custom Fields Integration

TrueCommerce Transaction Manager™ allows you to seamlessly integrate custom fields of your choice. Whether it's shipment and delivery dates or other key data, our solution ensures that these fields are automatically recognized and populated. This eliminates the need for manual data entry, streamlining your document processing and saving you time.

Features at a Glance

- Pre-Built ERP Integration for NetSuite
- Automation of Core Business Documents
- Direct SuiteTalk Web Services Integration
- Built-In Process Controls for Data Accuracy
- Deep Warehouse & Fulfillment Integration

Connect to 100+ Marketplaces and Storefronts Worldwide

Integrate NetSuite seamlessly with more than 100 leading online marketplaces and storefronts, including Amazon, eBay, Walmart, Shopify, WooCommerce, and more. Automatically exchange order, fulfillment, customer, and inventory data across all platforms, eliminating the need for manual entry and ensuring accuracy. Whether you're managing sales through marketplaces like Amazon Seller Central and Vendor Central or popular web stores like Magento and BigCommerce, our solution streamlines your operations by synchronizing data in real-time. Enjoy faster order processing, automated customer creation, and consistent updates to pricing and inventory—enhancing visibility and efficiency across your entire eCommerce ecosystem.

> TrueCommerce's seamless integration with NetSuite has been a game-changer for us. We knew there was a strong commitment from TrueCommerce to grow with NetSuite customers and ensure smooth connectivity with all our retailers. At no point did we experience any lag in our relationship.
