SAP®

Integrated EDI for SAP ECC

Companies using SAP ECC face numerous challenges, from the complexities of EDI implementation and managing diverse trading partner requirements to the risks of manual data entry and configuration difficulties with eCommerce platforms. These pain points can hinder efficiency, increase costs, and strain valuable business relationships. TrueCommerce's flexible EDI solution is configurable to meet your needs with SAP ECC and is designed to overcome these obstacles. It is a a comprehensive solution that supports streamlined data exchange, ensures compliance, and delivers significant benefits that enhance overall business agility.

TrueCommerce makes EDI painless by providing businesses of all sizes with complete, end-to-end solutions that are easy to use, robust and affordable— along with market-leading support and services to ensure your success.

Complete Solution From One Source

Our unique modular approach enables us to offer a true end-to-end EDI solution that is easy to use and unparalleled in scalability. We've taken the complexity out of implementing EDI by providing all four of the components you need to successfully deploy EDI:

Benefits

01

Reliable, configurable and complete EDI solution for SAP ECC meets your specific business requirements and increases the return on SAP investments

02

Seamlessly comply with trading partners' EDI requirements while moving EDI data in and out of SAP

03

Connect directly with over 180,000 trading partners on the TrueCommerce global trading network, with timesaving EDI mapping updates at no extra cost

Connectivity with your trading partner(s) is required to transmit EDI documents, whether directly via the Internet or through a "Value Added Network," or VAN. The TrueCommerce Trading Network (VAN) is our Internet-based transaction gateway, across which your EDI transactions are transmitted, providing connectivity with all of your trading partners. It is compliant with virtually any connectivity protocol, including AS1/ AS2/ AS3, FTP and (if required) VAN interconnects.

Web-based, User-Friendly EDI Translation Software—TrueCommerce Transaction ManagerTM—converts business documents from raw EDI data (ANSI ASC X12 and EDIFACT standard) into a human-readable business form.

Data Mapping and Managed Services provide the ability to seamlessly send and receive information between Transaction Manager and SAP ECC through a collection of intelligent software modules. These modules are programmed to format your inbound EDI transactions to match your configurations within SAP ECC and align your outbound transactions with your trading partners' requirements. As a managed service

provider, TrueCommerce handles the complexities of managing trading partner mapping updates, ensuring your business remains compliant with evolving standards. Additionally, our self-service tools, like Mapping Manager, empower power users to manage portions of their EDI solution independently. TrueCommerce continuously updates the platform to meet the latest industry requirements, offering flexibility and scalability as your business grows.

Support is a critical component of a complete, end-to-end EDI solution. Our team has the broad range of expertise to handle not only all of your trading partners' requirements, but also any technical issues related to business system configuration and the sending and receiving of your EDI documents. You can also count on the support team to provide the advice and guidance you'll need to be successful. Even if you aren't familiar or comfortable with EDI, we'll be there to help you get up and running, step by step.

How Our Integrations Work

1	2	3	4
Business documents	**EDI solutions convert outgoing messages**	**EDI documents are transmitted securely**	**Your partner's systems receive and process**
(e.g., purchase orders, inventory, freight details) are automatically sent from your internal system.	to meet your trading partner's format and compliance requirements.	through the TrueCommerce Global Commerce Network.	incoming documents and may generate new responses automatically.

Flexible EDI for SAP ECC

Choosing an end-to-end EDI solution that offers reliable, data translation with your SAP ECC system is a strategic investment that can improve customer relationships, business agility and profitability. But that's just the beginning of what TrueCommerce EDI offers our customers!

TrueCommerce EDI with SAP ECC reduces the need to print or rekey transactions, yielding an easy-to-use solution that is ideal for manufacturers, distributors and retailers. TrueCommerce EDI can integrate a wide range of transactions using SAP's IDOC format—so you can meet all of your customers' EDI requirements and also optionally streamline communications with suppliers and 3PLs. Then integrate your marketplaces, web storefront, and more!

Web-based EDI

A web-based, integrated EDI solution hosted by TrueCommerce offers anytime/ anywhere access, with no maintenance, backup or update responsibilities.

Flexible Support For Your Unique Transation Requirements

TrueCommerce EDI leverages file-level integration with SAP ECC using SAP's IDOC format. Configurable to your specific business needs, this robust, highly scalable solution can meet your transactional requirements by integrating key business documents like purchase orders (EDI 850), sales orders/ invoices (EDI 810), advance ship notices (EDI 856) and warehouse shipping documents (EDI 940).

TrueCommerce EDI also supports multiple EDI formats and versions, including ANSI ASC X12, EDIFACT, TRADACOMS, XML and more. By increasing automation and helping to prevent errors and delays associated with manual data entry, TrueCommerce EDI for SAP ECC accelerates order processing and improves customer service levels, while reducing operational costs. The result is enhanced process efficiency and higher overall productivity without adding additional resources.

Automated Safeguards Ensure Completeness and Accuracy

To help improve data integrity, speed order turnaround and reduce errors and chargebacks, TrueCommerce EDI ensures that required data is entered correctly and will notify you of specific invalid fields or missing data prior to sending transactions.

Connect to 100+ Marketplaces and Storefronts Worldwide

Integrate SAP seamlessly with more than 100 leading online marketplaces and storefronts, including Amazon, eBay, Walmart, Shopify, WooCommerce, and more. Automatically exchange order, fulfillment, customer, and inventory data across all platforms, eliminating the need for manual entry and ensuring accuracy. Whether you're managing sales through marketplaces like Amazon Seller Central and Vendor Central or popular web stores like Magento and BigCommerce, our solution streamlines your operations by synchronizing data in real-time. Enjoy faster order processing, automated customer creation, and consistent updates to pricing and inventory—enhancing visibility and efficiency across your entire eCommerce ecosystem.

Integrate with Retailer APIs

Connect directly with your trading partners' API platforms. Our API integration lets you exchange data in real-time for increased accuracy, higher performance, faster order processing, and lower costs. Keep inventory up-to-date with inventory feed automation and enjoy fully supported map updates for ongoing compliance.
