

UCC-128 Labeling

Cavender's requires vendors to use the UCC-128 barcode on every carton:

- Cavender's requests you follow the GS1 specifications when producing the UCC-128 label. You can or visit their website at www.gs1.org.
- Create a UCC-128 Carton Label with the following accurate information.
 - Ship To and From Address
 - Barcode and Human Readable Zip
 - Carrier Information
 - PO #, UPC#, Style#, Size, Color, Description and Carton Qty
 - Store number (mark for store)
 - Unit UPC Barcode if packed one UPC per box or Store # Barcode
 - Number of cartons (example: Carton 3 of 6)
 - UCC-128 barcode and Human Readable Carton Number
 - The label must be correct and scannable

Sample UCC-128 Shipping Label

Shaded = Required Information

Unshaded = Optional Information

UCC-128 label should be created based on the Uniform Code Council Guidelines

UCC-128 Label Placement

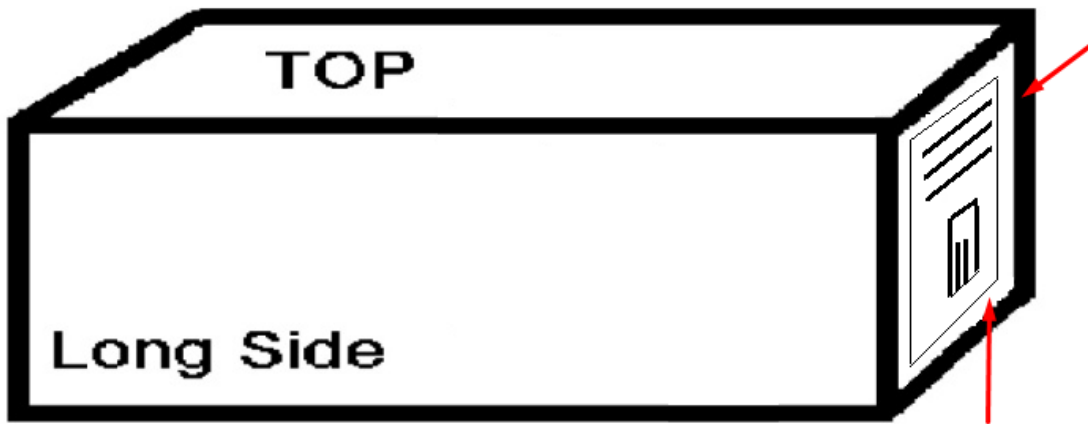

- The UCC-128 barcode and human readable carton number must match the ASN and be unique to each carton.

- The UCC-128 carton number on the carton label must be included in the ASN and be unique to each carton.
- Place the UCC-128 shipping label on end of the carton as shown below.
- Label placement should be in the bottom left hand corner. The vendor could then use the bottom right hand corner for their product label (style / sz / dim).

Place the label on the end of a carton of the carton in the lower left corner.

Not on the top, bottom, or long side. Ideally, all in the bottom left hand corner.

If label does not fit, please wrap it over the top leaving the barcode on the side.
