

ORDERS Purchase order message

EDIFACT/D01B/ORDERS : ORDERS Purchase order message

Version: 1.6 Final

Company:

DiCentral

Publication:

5/9/2021

Notes

The Lucid Motors Purchase Order (EDI/FACT ORDERS) is used to create a Purchase Order / Schedule Agreement of labor and/or specific parts and quantities. The Purchase Order can be used to create the following order types: Standard, Framework or Schedule Agreement.

Please note that

- Only the elements and sub-elements that are used in the transaction are present in the guide to improve readability.
- Segments, elements and sub-elements are described as "Used" and "Must use". When they are marked as "Used", they are optional fields; when they are marked as "Must use", they are mandatory fields.

FREQUENCY: Orders will be provided on approval from Lucid.

TRANSMITTED FROM: Lucid Motors

TRANSMITTED TO: Suppliers; 3PL Warehouses

INCLUDED IN ORDERS:

- Purchase Order (PO) or Scheduling Agreement (SA) Number
- PO or SA Line Number
- Quantity
- Price
- Ship To

BUSINESS RULES:

- One ORDERS per Trading Partner Purchase Order (PO), Ship From and Ship To locations
- Changes to ORDERS demand will be sent in a ORDCHG (see separate specification for this)
- ORDERS can be used to facilitate 3 differing Order Types:
 - Schedule Agreements - Annual Blanket orders
 - No authorization to ship demand
 - Standard Orders - Discrete orders, With Qty, Specific delivery date and Ship to location
 - Authorized to ship demand
 - Framework Orders - Hybrid Blanket order, with specific Qty, Ship to Location and Horizon delivery range.
 - Authorized to ship demand
 - Supplier can send multiple shipments against this order within the Horizon range
- Each Standard/Framework PO Line item request will contain a unique release number
 - This unique release number will follow that demand item through its life
 - Changes to Line Item Quantity, Ship/Due date and Part number will not change the unique release number associated with this line item.
- Data listed under 'INCLUDED IN ORDERS' transmitted in a Standard/Framework ORDERS transaction is expected to be returned in the DESADV and INVOIC, along with identified Release Number
- All messages must be responded to with a CONTRL response message

GLOSSARY OF TERMS

- Product >> Name of part/product being sold by supplier and bought by customer
- Product Serial >> Unique identifier for each physical piece
 - Etched / stamped / embedded / bolted etc. on product
 - Follows that product for its life
 - Retired after product is retired / destroyed
- Returnable Container >> Parallels a product name, in that it is a name that can be applied to containers of which all have the same size, structure, weight, material construct, etc.
- Returnable Container Serial >> Unique identifier for each physical container
 - Etched / stamped / embedded /etc. on container i.e., like RFID

- Follows that container for its life
- Retired after container is retired / destroyed
- Shipping Serial >> Unique identifier printed on a label that can be removed from container
 - Also known as License Plate, License Plate Serial, Container Serial, Mix / Master / Pack Serial, Barcoded Label Serial, Label Serial.
- Release number >> Unique identifier for a specific release of material.
 - Also known as Release Authorization Number
 - The Release number will be provided in two formats
 - For Standard and Framework orders the Format will be: Purchase order number + Order Line Item number + 0001 Final length = 19 digits
 - Schedule agreement release number format will be: Purchase order number+ Order Line Item number + Schedule line number. Final length = 19 digits (*THIS IS NOT PROVIDED IN THE ORDERS. IT IS PROVIDED IN THE DELJIT AS A SINGLE 19 DIGIT NUMBER*)

Purchase Order Types

<u>Code</u>	<u>Name</u>
220	Standard Purchase Order (Discreet, NB)
221	Scheduling Agreement (Blanket, ZLPA or LPA)
226	Framework Order (Hybrid Blanket, FO, Single order with supplier-defined deliveries according to horizon date)

NOTATION:

- M=Mandatory
- O=Optional
- X=Conditional
- AN=Alphanumeric
- Nx=Numeric with x decimal places

CHANGE LOG =====

- ORDERS VERSION 1.0 2020.08.27
 - Initial version
- ORDERS VERSION 1.1 2020.08.29
 - Lucid Internal review
- ORDERS VERSION 1.2 2020.09.15
 - First Supplier release.
- ORDERS VERSION 1.3 2020.10.29
 - Added notation for Plant ID (UD) in NAD01.
- ORDERS VERSION 1.4 2021.01.21
 - Added New Order Type Code table
 - Added Release number process Rules
 - Added Horizon Date Range/Delivery date and Business rules.
 - Removed specific Supplier Elements
 - Added multiple Order type capability (Standard, Framework, Schedule agreement)
 - Changed Plant ID from (UD) to (ST)
 - Added Code FD to (NAD 01)
 - BGM - order type descriptions modified to clarify, removed function code 5 (Replace)
 - DTM - added date type 137 (Document) and removed 2 (Delivery), 4 (Order), 10 (Shipment requested), 36 (Expiry)
 - SG1.RFF (header) - removed
 - SG2.NAD - added party code FD (Buyer's parent company), II (Invoice issuer) and removed IM (Importer), NI (Notify party), SU (Supplier), UD (Ultimate customer), WH (Warehouse keeper)
 - SG5.CTA - added function code PD (Purchasing contact)
 - SG8.PAT/DTM/PCD, SG9.MOA - added to allow addition of payment terms (optional)
 - SG28.PIA - added item type ID code PL (Purchaser's order line number and removed PO (PO number), SA (Supplier's article number), ED (Engineering change level)
 - SG28.QTY - added quantity type code 1 (Discreet quantity)
 - SG28.DTM - added to transmit delivery requested, shipment requested dates for Standard orders
 - SG32.PRI - added price type code

- SG32.CUX - removed (currency reported at the header)
 - SG33.RFF - added release number
 - SG38.TAX/LOC - added to transmit tax type, jurisdiction
 - SG51.TOD - added to transmit delivery terms
- ORDERS VERSION 1.5 2021.03.10
- SG28.DTM - added time (hours/minutes) to delivery and ship dates
- ORDERS VERSION 1.6 2021.05.09
- Updated Business Rules

Clarification:

- 1/0010 A service segment starting and uniquely identifying a message. The message type code for the Purchase order message is ORDERS. Note: Purchase order messages conforming to this document must contain the following data in segment UNH, composite S009: Data element 0065 ORDERS 0052 D 0054 01B 0051 UN
- 1/0020 A segment by which the sender must uniquely identify the order by means of its name and number and when necessary, its function.
- 1/0030 A segment specifying general dates and, when relevant, times related to the whole message. The segment must be specified at least once to identify the order date. Examples of the use of this DTM segment are: Lead times that apply to the whole of the Order and, if no schedule is to be specified, the delivery date. The Date/time/period segment within other Segment group should be used whenever the date/time/period requires to be logically related to another specified data item. e.g., Payment due date is specified within the PAT Segment group.
- 1/0120 A group of segments identifying the parties with associated information.
- 1/0130 A segment identifying names and addresses of the parties, in coded or clear form, and their functions relevant to the order. Identification of the seller and buyer parties is mandatory for the order message. It is recommended that where possible only the coded form of the party ID should be specified e.g. The Buyer and Seller are known to each other, thus only the coded ID is required, but the Consignee or Delivery address may vary and would have to be clearly specified, preferably in structured format.
- 1/0220 A group of segments giving contact details of the specific person or department within the party identified in the NAD segment.
- 1/0230 A segment to identify a person or department, and their function, to whom communications should be directed.
- 1/0240 A segment to identify a communications type and number for the contact specified in the CTA segment.
- 1/0290 A group of segments specifying the currencies and related dates/periods valid for the whole order. Currency data may be omitted in national applications but will be required for international transactions.
- 1/0300 A segment identifying the currencies required in the order e.g., the order currency. A rate of exchange may be given to convert a reference currency into a target currency.
- 1/0330 A segment group specifying the terms of payment and accounting classifications applicable to the entire message.
- 1/0340 A segment identifying the payment terms and date/time basis.
- 1/0350 A segment giving the specific date/time/period, if needed, of any payments, discounts, installments etc.
- 1/0360 A segment specifying the discount, interest, penalty as well as installment percentage.
- 1/0370 A group of segments identifying accounting classification reference number data and related monetary amounts at the header level.
- 1/0380 A segment specifying the amount associated with the specified accounting classification reference number data and payment information.
- 2/1030 A group of segments providing details of the individual ordered items. This segment group may be repeated to give sub-line details.
- 2/1040 A segment identifying the line item by the line number and configuration level, and additionally, identifying the product or service ordered. Other product identification numbers e.g., Buyer product number, etc. can be specified within the following PIA segment.
- 2/1050 A segment providing either additional identification to the product specified in the LIN segment (e.g., Harmonized System number), or provides any substitute product identification.
- 2/1060 A segment for describing the product or service being ordered as well as product characteristic. This segment should be used for products or services that cannot be fully identified by a product code or article number.
- 2/1080 A segment identifying the product quantities e.g., ordered quantity.
- 2/1110 A segment specifying date/time/period details relating to the line item only.
- 2/1320 A group of segments identifying the relevant pricing information for the goods or services ordered.
- 2/1330 A segment to specify the price type and amount. The price used in the calculation of the line amount will be identified as 'price'.
- 2/1380 A group of segments giving references and where necessary, their dates, relating to the line item.
- 2/1390 A segment identifying the reference by its number and where appropriate a line number within a document.
- 2/1610 A group of segments specifying tax related information, and when necessary, the location(s) to which that tax information relates.
- 2/1620 A segment specifying a tax type, category and rate, or exemption, relating to the line item.
- 2/1640 A segment indicating the location to which the tax or exemption specified in the TAX segment applies e.g., city or state tax.
- 2/2020 A group of segments indicating the terms of delivery for the line item where this is different to or not specified within the heading section.
- 2/2030 A segment identifying the delivery terms to be used.
- 3/2330 A service segment placed at the start of the summary section to avoid segment collision.
- 3/2350 A segment by which control totals may be provided by the sender for checking by the receiver.

3/2400 A service segment ending a message, giving the total number of segments in the message (including the UNH & UNT) and the control reference number of the message.

UNH MESSAGE HEADER

Pos: 0010	Max: 1
Mandatory
