EDI for Xero

Comply with your customers' EDI requirements, eliminate manual data entry and streamline your internal processes with Xero EDI Integration from TrueCommerce

Maximise the value of Xero and increase efficiency with Xero EDI integration

It is not uncommon for Xero users to invest in an EDI solution simply to comply with their customers' electronic trading requirements. However, EDI should not be seen as simply a cost of doing business – it's a strategic investment for small and medium sized businesses (SMB's) that makes you more competitive, delivering ROI multiple times over. The key to unlocking the value of EDI is to move beyond compliance to an EDI solution that is fully integrated with your Xero system.

The TrueCommerce EDI for Xero solution increases the speed and efficiency of trading with your customers by removing the manual processes otherwise needed to move data between your EDI and Xero systems. By automating the exchange of EDI messages you can process more orders in less time and redeploy internal resources into more strategic areas of the business.

Fully Managed Service

EDI specialists manage the onboarding, set up and maintenance of your EDI connections.

Cloud-based Platform

No hardware or software required in your local environment.

End-to-End Solution

A complete solution offering integration, message translation and validation, and a global trading partner network.

Key Benefits of Xero EDI Integration:

Save your business time and money

Our Xero EDI solution allows orders, invoices and credit notes to be directly integrated with your Xero system, providing you with real-time visibility and increased speed and efficiency.

Improve customer service with increased accuracy

Advanced error checking and validation maintains data integrity and improves service levels by automatically flagging issues so they can be rectified before they impact your customers.

Scale your business

Quickly and easily add new customers as you win business with a fully scalable solution and a global trading partner network of over 120,000 global connections.
