COMPLETE SOLUTION FROM ONE SOURCE

Our unique modular approach enables us to offer a true end-to-end EDI solution that is easy to use and unparalleled in scalability. We've taken the complexity out of implementing EDI by providing all four of the components you need to successfully deploy EDI:

Connectivity with your trading partner(s) is required to transmit EDI documents, whether directly via the Internet or through a "Value Added Network," or VAN. The TrueCommerce Trading Network (VAN) is our Internet-based transaction gateway, across which your EDI transactions are transmitted, providing connectivity with all of your trading partners. It is compliant with virtually any connectivity protocol, including AS1/AS2/AS3, FTP and (if required) VAN interconnects.

Web-based EDI Translation Software, TrueCommerce Transaction Manager, is our user-friendly translation software that converts business documents from raw EDI data (ANSI ASC X12 EDI standard) into a human-readable business form. TrueCommerce Transaction Manager can be deployed as on-premise software or as a web-based (SaaS) deployment hosted by TrueCommerce.

Data Mapping and Integration provide the ability to seamlessly send and receive information between Transaction Manager and your business system through the TrueCommerce Business System Plug-In™.

This is achieved by processing EDI transactions through a collection of intelligent software modules. These modules are programmed to format your inbound EDI transactions to match against your configurations within your business system as well as match your outbound transactions against your trading partner's requirements. As your business grows and you acquire new customers, additional trading partner maps can easily be added and seamlessly integrated with your TrueCommerce solution.

Support is a critical component of a complete, end-to-end EDI solution. Our Professional Services team has the broad range of expertise to handle not only all of your trading partners' requirements, but also any technical issues related to business system integration and the sending and receiving of your EDI documents. You can also count on the support team to provide the advice and guidance you'll need to be successful. Even if you aren't familiar or comfortable with EDI, we'll be there to help you get up and running, step by step.

Achieve new levels of supply chain performance with our cloud-based, integrated EDI solutions that are easy to use, robust and affordable, so you can do business in every direction.
