

Integrated Commerce in the Cloud for Microsoft Dynamics GP

TrueCommerce is the most complete way to connect your business across the supply chain – from EDI to marketplaces to fulfillment and more – so you can do business in every direction.

COMPLETE SOLUTION FROM ONE SOURCE

Our unique modular approach enables us to offer a true end-to-end EDI solution that is easy to use and unparalleled in scalability. We've taken the complexity out of implementing EDI by providing all four of the components you need to successfully deploy EDI:

Connectivity with your trading partner(s) is required to transmit EDI documents, whether directly via the Internet or through a "Value Added Network," or VAN. The TrueCommerce Trading Network (VAN) is our Internet-based transaction gateway, across which your EDI transactions are transmitted, providing connectivity with all of your trading partners. It is compliant with virtually any connectivity protocol, including AS1/AS2/AS3, FTP and (if required) VAN interconnects.

Web-Based EDI Translation Software, TrueCommerce Transaction Manager, is our user-friendly translation software that converts business documents from raw EDI data (ANSI ASC X12 and EDIFACT standard) into a human-readable business form. TrueCommerce Transaction Manager can be deployed as on-premises software or as a web-based (SaaS) deployment hosted by TrueCommerce.

Data Mapping and Integration provide the ability to seamlessly send and receive information between Transaction Manager and Microsoft Dynamics GP through the TrueCommerce Business System Plug-In™.

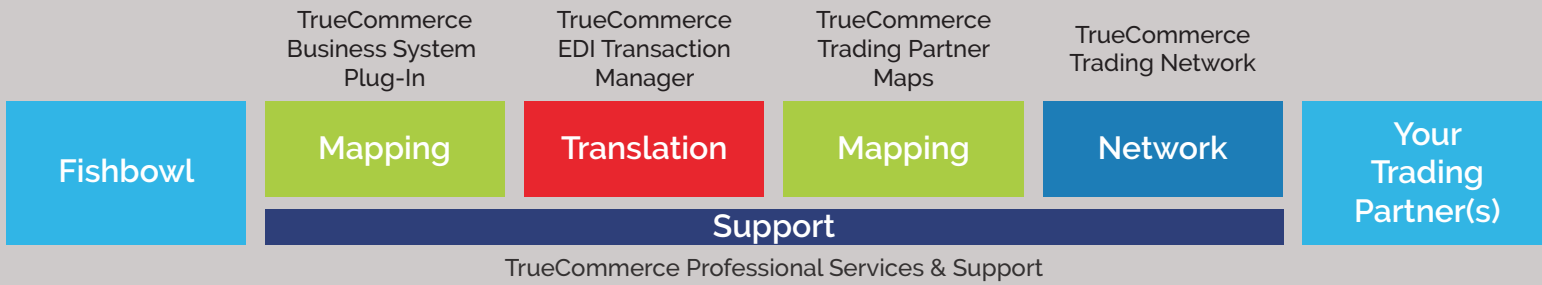

"I've estimated that we've reduced costs by approximately 45% a month compared with our previous system and we've improved productivity by 30%."

- Yanni Herrera, Operations Manager,
Mobi Technologies, Inc.

This is achieved by processing EDI transactions through a collection of intelligent software modules. These modules are programmed to format your inbound EDI transactions to match against your configurations within Microsoft Dynamics GP as well as match your outbound transactions against your trading partner's requirements. As your business grows and you acquire new customers, additional trading partner maps can easily be added and seamlessly integrated with your TrueCommerce solution.

Support is a critical component of a complete, end-to-end EDI solution. Our Professional Services team has the broad range of expertise to handle not only all of your trading partners' requirements, but also any technical issues related to business system integration and the sending and receiving of your EDI documents. You can also count on the support team to provide the advice and guidance you'll need to be successful. Even if you aren't familiar or comfortable with EDI, we'll be there to help you get up and running, step by step.

TrueCommerce EDI Solutions

INTEGRATE YOUR ENTIRE SUPPLY CHAIN WITH MICROSOFT DYNAMICS GP

Choosing an end-to-end EDI solution that offers seamless integration with Microsoft Dynamics GP is a strategic investment that can improve customer relationships, business agility and profitability. But that's just the beginning of what TrueCommerce integrations offer our customers!

TrueCommerce Transaction Manager Features and Benefits for Microsoft Dynamics GP

Seamless Integration Your Business Can Rely On:

- » Advanced support for Dynamics GP business logic ensures smooth alignment with your business processes and eliminates the need to enter duplicate data
- » The integration leverages Microsoft Dynamics GP eConnect, the approach Microsoft recommends to ensure tight, trouble-free integration

Built-in Process Controls Ensure Data Integrity, Reducing Errors and Chargebacks

- » You can automate and schedule all data exchanges between Dynamics GP and TrueCommerce Transaction Manager; no user interaction is required
- » The TrueCommerce solution automatically ensures that all required data has been entered before sending an EDI transaction to your customer
- » TrueCommerce Transaction Manager automatically ensures that customer ID, ship-to codes, and item number fields are valid upon creation of a sales order
- » You can optionally validate unit price fields

Robust Sales Integration Streamlines Transactions and Reduces Effort:

- » Dynamics GP sales integration supports integrated documents such as sales orders, purchase order acknowledgements, invoices, returns, change orders, and advance ship notices

- » Advance ship notice integration supports no pack, pick and pack and standard packing for both carton and pallet, as well as automated shipment consolidation options
- » Pallet and package level details can be included on the ASN; giving more options to those who may ship in large volumes
- » Use shipment automation to create multiple shipments at the same time
- » Create customer-specific auto-pack logic, using predefined rules, to package shipments automatically
- » Option to update existing sales orders

Remote Warehouse and 3PL Integration Streamlines Your Connection with 3PL Providers:

- » Seamlessly integrates outbound sales orders and inbound shipments
- » An export of sales orders from Dynamics GP automatically creates an outbound 940 warehouse shipping order
- » Create logic, leveraging native Dynamics GP functionality to help track any order fulfillment challenges referenced from the warehouse shipping advice (i.e., back-orders)
- » Inbound shipments (EDI transactions 945/856) automatically create shipments in Dynamics GP, including package and pallet details
- » Automatically update lot numbers from inbound shipments
- » Easily create outbound advance ship notice from inbound shipments – no need to print or re-enter data.

Automate Everyday Tasks

Import and export EDI transactions at scheduled times with the TrueCommerce Scheduler™ add-on. To meet partners' labeling and packing requirements with one solution, the TrueCommerce Labeling add-on automates creation of UCC/GS1-128 compliant, barcoded labels, with label and packing list template updates included free. To integrate EDI with popular shipping systems like FedEx and UPS, choose the TrueCommerce Shipping Module.

Custom Fields Integration

TrueCommerce Transaction Manager supports integration for custom fields of your choice. While a number of data fields can be integrated, shipment and delivery dates might illustrate essential data that is important when processing your documents. Regardless of which field or data type you would like to integrate as a custom field, Transaction Manager will automatically recognize and populate those fields; eliminating the need to manually re-key that data each time.

EDI Is Just the Beginning!

To do business in every direction, Microsoft Dynamics GP users need to move more data faster across more channels, maximize automation and eliminate manual effort. As the most complete way to connect your business across the supply chain, TrueCommerce offers an unrivaled choice of integrations and value-added capabilities.

Connect to Marketplaces—Including Amazon

Connect Microsoft Dynamics GP to leading online marketplaces like eBay, Walmart, Google, AliExpress and nearly 100 other top marketplaces globally. Automatically exchange order, fulfillment, customer and inventory data between marketplaces and Microsoft Dynamics GP—no more retyping. TrueCommerce can also integrate Microsoft Dynamics GP with Amazon Seller Central or Vendor Central to move order and inventory data back-and-forth

BENEFITS

- » Certified for Microsoft Dynamics GP, Microsoft's highest standard for partnerdeveloped software
- » An unequaled range of commerce solutions, including end-to-end EDI, digital marketplace and storefront integrations, fulfillment automation and much more
- » More than 18,000 companies improve business productivity daily with the TrueCommerce Trading Network
- » Trading partner mapping updates at no charge
- » Unlimited, region-based support and free software updates

automatically between Amazon and Microsoft Dynamics GP.

Connect to Storefronts

Connect Microsoft Dynamics GP to leading online storefronts, including Shopify, Magento (Adobe Commerce), and WooCommerce. Process online orders in minutes and automatically update pricing and inventory between your online store and Microsoft Dynamics GP.

Integrate with Retailer APIs

Connect directly with your trading partners' API platforms. Our API integration lets you exchange data in real time for increased accuracy, higher performance, faster order processing, and lower costs. Keep inventory up-to-date with inventory feed automation, and enjoy fully-supported map updates for ongoing compliance.
