EDI Integration for Microsoft Dynamics 365 Business Central

Strengthen Your Business with an Integrated Solution for Microsoft Dynamics 365 Business Central

TrueCommerce offers a complete solution that can easily connect your business to your entire supply chain. Full EDI integration with suppliers, customers and third-party logistics partners (3PLs) can give you full visibility and therefore strengthen your business as a whole!

EDI is a strategic investment that improves your company's competitiveness. The investment pays off again and again. Your company saves money and can reinvest time spent on manual work processes into other important areas of the business.

Advantages of Cloud-Based EDI

With more streamlined business processes and increased support, you can be ready to take the next step in your organization using:

- A solution that is ideal for manufacturing companies, wholesalers and retailers who need to be able to handle critical business documents efficiently and automatically while supporting requirements for specific formats.

- A solid integration that automates the process of incoming orders and outgoing order acknowledgements, which reduces manual work times, minimizes errors and strengthens your business.

- An automated platform to send and receive invoices and credit notes.

- A reliable process that verifies unit pricing and validates transfers to prevent errors and chargebacks.

Free up internal resources and focus on your core business with TrueCommerce's game-changing fully managed EDI service

TrueCommerce Managed Service

Business Rules

Business rules can be configured based on specific scenarios that our client defines.
This ensures high-level document data customized for our client's business flow.

Business rule monitors and alerts can detect and notify the appropriate stakeholders, enabling them to correct the transaction in the originating business system and submit a new message for processing

Digitalization & Operation

Digitalization & Operation ensures an infrastructure where messages are processed flawlessly in terms of message structure, message type, syntax and invalid data. Errors are proactively identified, corrected and/or communicated.

By selecting Digitalization & Operation, the client outsources their mappings to TrueCommerce, enabling TrueCommerce to identify the reason for failed messages.

Assured Delivery & Connectivity

Assured Delivery & Connectivity ensures a robust infrastructure where services are continuously monitored and operating correctly and all messages are processed.

This includes the network, the hardware and operating systems, the application, and the processing of messages.

TrueCommerce™

With Our Managed Service, You Get:

- Robust integration into Microsoft Dynamics 365 Business Central.

- Access to a global network. TrueCommerce gives you access to a global trading network of more than 180,000 companies.

- Accurate message transaction. As part of our service, we validate EDI messages before they are sent through to your Dynamics 365 BC platform.

- A dedicated team of specialists who manage both the implementation process and day-to-day operations.

- A stable and reliable platform with 99.8% uptime.

- An efficient and accurate network. We proactively monitor your solution so you can trust that your documents reach the recipient safely and on time. TrueCommerce handles any errors on your behalf—often without you even noticing them.

EDI INTEGRATION PURPOSE-BUILT FOR MICROSOFT DYNAMICS 365 BUSINESS CENTRAL

Built-in Process Controls That Ensure Data Integrity, Reduce Errors and Minimize Refunds

- Validate completed fields before transactions are made. In the event of missing data, you will receive an alert. This means that the invoicing and payment process will not be delayed as a result of incomplete or faulty data.

- Support for multiple pricing tiers. An automatic price verification notifies you in the event of a price difference.

- Other checks include verification of order numbers and item numbers before you make the transfer in Microsoft Dynamics 365 BC.

Seamless Integration Icreases Efficiency and Improves Customer Service

- Support sales and purchase orders, order acknowledgements, advanced shipping notifications and invoice transfers.

- Tailor-made solutions include packaging rules adapted to the different needs of your customers.

- Outgoing ASN integration supports pick and pack, package and pallet shipments.

- Automated packing allows you to collect your shipments in Microsoft Dynamics 365 BC. This streamlines the process of creating and packing goods.

Streamlined Communication to Your Third-Party Warehouse

- Automatically create outgoing orders in Microsoft Dynamics 365 BC.

- Notifications from the warehouse will update existing shipments with package and shipment information (e.g., tracking numbers, weight and quantity).

- Support for information such as batch and serial numbers, as well as the total number of shipments.

- Outbound ASNs or DESADV messages can easily be sent to your customers based on the information from the Shipping Advice.

EDI Is Just the Beginning!

If you exchange documents across multiple sales channels and national borders, it's important to increase automation with a solution that can handle large amounts of data quickly and without errors.

TrueCommerce offers a complete solution with a wide range of integrations that add value to your business and connect to your entire supply chain.
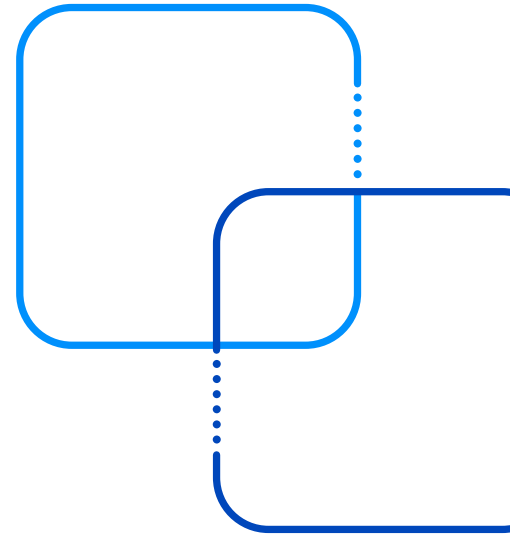

Connect to Marketplaces

Connect Microsoft Dynamics to leading online marketplaces like eBay, Walmart, Google, AliExpress, and more than 100 other global marketplaces. Automatically exchange order, fulfillment, customer, and inventory data between marketplaces and Microsoft Dynamics—no more retyping. TrueCommerce can also integrate Microsoft Dynamics with Amazon Seller Central or Vendor Central to automatically move order and inventory data between Amazon and Microsoft Dynamics. Plus, create new customers in Microsoft Dynamics automatically for orders from your eCommerce and drop ship channels. The system checks for existing customers to prevent duplication and offers greater visibility into your online shoppers!

Connect to Storefronts

Link Microsoft Dynamics to leading online storefronts, including Shopify, WooCommerce, BigCommerce, and Adobe Commerce (Magento). Process online orders in minutes and automatically update pricing and inventory between your online store and Microsoft Dynamics.

Integrate with Retailer APIs

Integrate directly with your trading partners' API platforms. Our API integration lets you exchange data in real time for increased accuracy, higher performance, faster order processing, and lower costs. Keep inventory up to date with inventory feed automation and enjoy fully supported map updates for ongoing compliance.
