

Integrated EDI for SAP ECC

TrueCommerce makes EDI painless by providing businesses of all sizes with complete, end-to-end solutions that are easy to use, robust and affordable—along with market-leading support and services to ensure your success.

Complete EDI Solution From One Trusted Source

Our unique modular approach enables us to offer a true end-to-end EDI solution that is easy to use and unparalleled in scalability. We've taken the complexity out of implementing EDI by providing all four of the components you need to successfully deploy EDI:

Connectivity with your trading partner(s) is required to transmit EDI documents, whether directly via the Internet or through a “Value Added Network,” or VAN. The TrueCommerce Trading Network (VAN) is our Internet-based transaction gateway, across which your EDI transactions are transmitted, providing connectivity with all of your trading partners. It is compliant with virtually any connectivity protocol, including AS1/ AS2/AS3, FTP and (if required) VAN interconnects.

Web-based, User-Friendly EDI Translation Software, called TrueCommerce Transaction Manager, converts business documents from raw EDI data (ANSI ASC X12 and EDIFACT standard) into a human-readable business form.

Data Mapping and Integration provide the ability to seamlessly send and receive information between Transaction Manager and SAP ECC through the TrueCommerce Business System Plug- In™. This is achieved by processing EDI transactions through a collection of intelligent software modules. These modules are programmed to format your inbound EDI transactions to match against your configurations within SAP ECC, as well as match your outbound transactions against your trading partner's requirements. As your business grows and you acquire new customers, additional trading partner maps can be easily added and seamlessly integrated with your TrueCommerce solution.

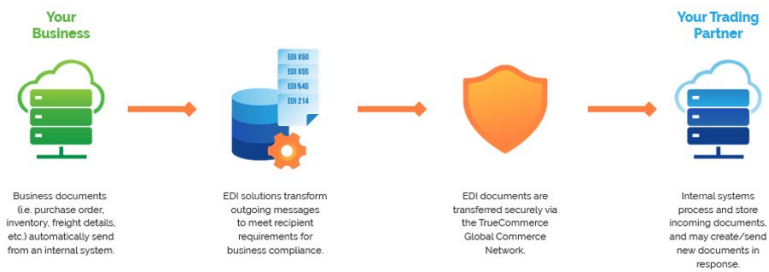

Benefits

- Reliable, configurable and complete EDI solution for SAP ECC from an SAP Silver Partner meets your specific business requirements and increases the return on SAP investments
- Seamlessly comply with trading partners' EDI requirements while automating the movement of EDI data in and out of SAP
- Connect directly with over 180,000 trading partners on the TrueCommerce global trading network, with timesaving EDI mapping updates at no extra cost

Support is a critical component of a complete, end-to-end EDI solution. Our team has the broad range of expertise to handle not only all of your trading partners' requirements, but also any technical issues related to business system integration and the sending and receiving of your EDI documents. You can also count on the support team to provide the advice and guidance you'll need to be successful. Even if you aren't familiar or comfortable with EDI, we'll be there to help you get up and running, step by step.

How EDI Works

With EDI, you can automate the many steps involved in order processing, from the initial purchase order, to ASNs and shipping updates, to invoices, and more. **Here's how.**

Integrated Commerce Solutions for SAP ECC

Choosing an end-to-end EDI solution that offers reliable, flexible integration with your SAP ECC system is a strategic investment that can improve customer relationships, business agility and profitability. But that's just the beginning of what TrueCommerce integration solutions offer our customers!

Integrating TrueCommerce EDI with SAP ECC reduces the need to print or rekey transactions, yielding a highly automated and easy-to-use solution that is ideal for manufacturers, distributors and retailers. TrueCommerce EDI can integrate a wide range of transactions using SAP's IDOC format—so you can meet all of your customers' EDI requirements and also optionally streamline communications with suppliers and 3PLs. Then integrate your marketplaces, web storefront, and more!

Web-based EDI

A web-based, integrated EDI solution hosted by TrueCommerce offers anytime/anywhere access, with no maintenance, backup or update responsibilities.

Flexible Support for Your Unique Transaction Requirements

TrueCommerce EDI leverages file-level integration with SAP ECC using SAP's IDOC format. Configurable to your specific business needs, this robust, highly scalable solution can meet your transactional requirements by integrating key business documents like purchase orders (EDI 850), sales orders/ invoices (EDI 810), advance ship notices (EDI 856) and warehouse shipping documents (EDI 940).

TrueCommerce EDI also supports multiple EDI formats and versions, including ANSI ASC X12, EDIFACT, TRADACOMS, XML and more. By increasing automation and helping to prevent errors and delays associated with manual data entry, integrated TrueCommerce EDI for SAP ECC accelerates order processing and improves customer service levels, while reducing operational costs. The result is enhanced process efficiency and higher overall productivity with no additional staff.

Automated Safeguards Ensure Completeness and Accuracy

To help improve data integrity, speed order turnaround and reduce errors and chargebacks, TrueCommerce EDI ensures that required data is entered correctly and will notify you of specific invalid fields or missing data prior to sending transactions.

EDI is Just the Beginning!

SAP ECC users need to move more data faster across more channels, maximize automation and eliminate manual effort. As the most complete way to connect your business across the supply chain, TrueCommerce offers an unrivaled choice of integrations and value-added capabilities.

Connect to Marketplaces—Including Amazon

Connect SAP ECC to leading online marketplaces like eBay, Walmart, Google, Zalando and nearly 100 other top marketplaces globally. Automatically exchange order, fulfillment, customer and inventory data between marketplaces and SAP—no more retyping. TrueCommerce can also integrate SAP with Amazon Seller Central or Vendor Central to move order and inventory data back and forth automatically with Amazon.

Connect to Storefronts

Connect SAP ECC to leading online storefronts, including Shopify, Magento, and WooCommerce. Process online orders in minutes and automatically update pricing and inventory between your online store and SAP ECC.

Integrate with Retailer APIs

Connect directly with your trading partners' API platforms. Our API integration lets you exchange data in real-time for increased accuracy, higher performance, faster order processing, and lower costs. Keep inventory up-to-date with inventory feed automation and enjoy fully supported map updates for ongoing compliance.

TrueCommerce EDI Solutions:

A Total EDI Solution for SAP ECC From One Reliable Source

Easy to Use

- As intuitive to use as email
- Point-and-click functionality

Free up internal resources and focus on your core business with TrueCommerce's game-changing fully managed EDI service
